CORRESPONDENCE

Kellogg, Idaho, April 11, 1922.

The Editor, Red Deer News.

Dear Sir,—

Will you kindly allow me a little space for the following letter?

In a letter Mr. Forhan published in your paper, I take it the former hotel proprietor he speaks of refers to me. In fairness to Chief Anderson, I cannot let this go unanswered. If Mr. Forhan or anyone else says I sold beer over strength with Mr. Anderson's permission, he is making a statement that is not true, and he knows it. Mr. Anderson warned me as he did others not to sell beer over strength, and several times took samples of what I was selling; and had he found it over strength he certainly would have arrested me for this as well as breaking any other law, and I would have expected him to do so.

If I had been arrested, and was guilty, I most certainly would not have squealed and tried to run down his character.

I want to say this, there never was a squarer chief anywhere than Mr. Anderson. I believe he tried to give every one a square deal. Instead of throwing people that were down and out in jail for some minor offence, he tried to help them where possible, but he wouldn't stand for being double-crossed.

He brought many a person to my hotel and offered to pay the rent on the room for the night out of his own pocket, and there are few that would do this.

A letter I received from Mr. Forhan some time ago will, I think, show who is trying to get someone, and if he wishes I will send it to you for publication.

Yours very truly,

P. THORNHILL.

PENHOLD NOTES

Remember the big Easter dance to be held in the hall on Friday evening, April 21, with Bone's orchestra to play for you. A splendid time assured to all. Admission only $1.50 per couple, including supper.

The regular monthly meeting of the Women's Institute will be held at the home of Mrs. H. R. McDougall on Thursday, at 3 o'clock, April 27th. Feather Demonstration in the cutting out of garments and first essentials in sewing by Mrs. M. J. Oxley. Each member requested to bring a written recipe for soups or cooked meats toward the compilation of W. I. cook book. Cordial invitation extended to all ladies of community to attend.

Miss Laura Oldford has finished her course at Normal school and is spending Easter holidays with her parents, after which she is taking a school west of Ponoka.

Miss Harte, of Macklin, visited her parents over Easter.

Mrs. Newlands and little ones, of Edmonton, is visiting her sister-in-law, Mrs. Tom Stewart.

Mrs. Grier and daughter are visiting Mrs. Fead.

Professor Ottewell will give an illustrated lecture on "The Canada of Tomorrow" on Wednesday night in the hall. Silver collection to defray expenses.

The Red Cross meeting has been postponed on account of the bad roads.

Mr. and Mrs. Arthur Oldford received word recently that they were grandparents and now wear the smile that won't come off.

Mrs. Wood and family spent Easter with her mother in Red Deer.

Several from here journeyed to Innisfail on Monday night to see the locals put on "Browne with an E."

Miss Edna Oldford was home for the holidays.

Kenneth Simpson visited Myles Pixley over the week end.

Miss McKinney is doing very nicely at last reports, and Mrs. Douglas expects to be up about Wednesday.

The ladies of Penhold and vicinity are invited to a millinery tea at the home of Mrs. Brown and Mrs. Ross, on Thursday afternoon, April 20th, from two to five o'clock. At this time, Mrs. Collins, of Edmonton, will be pleased to meet former patrons and all interested in a display of hand made hats.

PENHOLD SCHOOL
EASTER EXAMINATIONS
Average Percentage

Grade 10—Margaret Dixon 79.

Grade 9—Opal Parsons 78, Auburn Pyre 73, Rhea Pegg 67, Wallace Douglas 59, Kenneth Simpson 56, Irinda Lee 55, Eva Page 54, Ellis Pye 52, Hector McDougall 49, Iva Fead 48, Addie Harte 48, George Harte 42.

Grade 8—Chester Hilditch 74, Thomas Hives 66, Robert Henderson 58, Clarence Mutch 43, Byron Henderson 39.

Grade 6—Jean Simpson 76, Addie Hives 71, John Stewart 66, Irene Stewart 63, Mary Walker 61, Alex. Johnson 59.

Grade 4—John B. Simpson 57, Lewis Henderson 55, Arthur Johnson 53, James Walker 51.

Grade 3—Florence Henderson 80, Francis Harte 73, Margaret Henderson 66, Dorothy Annear 63, Frank Cosgrove 60, Bennie Simpson 55, Gladys Cosgrove 50, David Walker 43.

Grade 2—Muriel Stewart 60, Walter Annear 55, Laura Johnson 53, Gordon McGillivray 45.

Grades 2 and 3 were marked on their year's work and had no exams.

G. D. MARTIN, Teacher.

Mr. Sheline got in a carload of second hand furniture from Calgary last week.

The services in St. Luke's Church Easter Sunday were well attended and of a high order. Two splendid discourses were given by the rector, Rev. Gerald McComas, and the musical part of the service by the large choir was well rendered. The anthem in the morning was "Now is Christ Risen," Mr. Harris taking the bass solo very well indeed. In the evening the anthem was "King of Kings." Miss Carswell taking the soprano solo exceptionally well.

FOOTBALL

The executive of the City Football League will meet on Monday evening next at 8 o'clock. All members are requested to be present.

Prospects for the formation of the Central Alberta Football League are bright. Ponoka and Red Deer are definitely committed to the organization; Lacombe is a strong possibility, and Innisfail will probably fall in line, although no meeting has been held to discuss the matter there yet.

BASEBALL

There was a very good attendance of baseball fans at the meeting in the city hall last Thursday night, when plans were discussed for the coming season.

It was definitely decided that a city league would be organized to run for the first part of the season, and ending somewhere about the time that school closes. The Knights of Pythias will enter a team, and it is expected that the High School, the Old Timers and the Mercantile team, at least, will hold franchises in the new league which will be run so as not to hazard the amateur standing of any young athletes who may take part. Fred Lund, Guy Nelson and S. Jones were appointed as a committee to look after the organization of the league.

It was agreed to arrange for a big opening day to start the season, and clear off the deficit on last year's operations. J. G. Fulton, Reg. Taylor and J. C. Brazier were appointed as a special committee to work with the officers in the arrangements and conduct of the event.

The meeting decided to reduce the size of the executive from what it was last year, and the following officers were chosen:

Hon. Pres.—W. E. Payne, K.C.
President—Dr. J. B. Long.
Sec'y-Treas.—H. F. Kenny.
Manager—Geo. F. Ely.

The plans for the club cannot be formulated very definitely yet, as the nature of the Central Alberta League has not been defined. Most of the best players in Red Deer are not eligible for amateur cards, and the club has decided that it will not ask either players or club officials to perjure themselves for the sake of getting cards. There is a conviction that too much of that sort of thing is being done elsewhere.

Definite plans should be matured within the next week or ten days, and will be duly announced.

CRICKET

The annual meeting of the Cricket Club will be held on Monday next, April 24, in the Land Registry office at 8 o'clock. All interested in this sport are asked to attend. An energetic effort will be made to put Red Deer on the map as far as cricket is concerned.

PAINTING UP

One of the first buildings in the city to benefit by the spring instinct to "paint up and clean up" will be the Cockshutt warehouse near the C. N. R. station. M. Card, agent for the Cockshutt Plow Co., has let the contract to England & Haxte, who are painting the interior of the office as well as the entire outer surface of the building.

This is a good start, and if every building in town is treated the same way, we will have one of the most attractive cities to be found anywhere. There are a few buildings that should be pulled down, as being neither ornamental nor useful. The Board of Trade might be able to get some action on this matter.

H. G. Stone & Sons have completed the transfer of the Imperial Bank, and a number of private citizens are taking action.

Let the good work go on.

CHURCH NOTICES

Baptist church, services Sunday, April 23rd: Preacher Mr. E. White, of Calgary. Morning, 11; evening, 7.30. 12 (noon) Sunday school. 3 p.m., service at Poplar Ridge school. A hearty invitation to all.

Knox church, April 23—Public worship at the usual hours. Morning subject, "The meaning of the bodily resurrection of Christ and its abiding value." Sabbath school at 2.30 p.m. Evening subject: Mr. Brown will give a brief report of his trip east in connection with the work of the church and the cause of prohibition.

St. Luke's (Anglican) church: The Bishop of Calgary will be in Red Deer on Sunday next, April 23, and will be the preacher at the induction service at 11 a.m. The services will be as follows: 8 a.m., Holy Communion, Celebrant the Bishop; 11 a.m., Matins and Induction Service, preacher the Bishop; 7.30 p.m., Choral Evensong and Sermon; 3.30 p.m., Sunday school. While in the city the Bishop will be the guest of Dr. and Mrs. Sanders.

The united meetings of the Ladies' Aid and Women's Missionary Society of Knox Presbyterian church will be held on Friday, 21st, at 3 o'clock, in the hall of the church. Mrs. McWear will give a report of the provincial meetings of the W.M.S. held at Calgary last week. All women of the congregation are welcome.

RED DEER HORTICULTURAL SOCIETY

A general meeting of the Society will be held in the City Library at 8 o'clock this evening. Mr. Paton will give practical demonstrations on potting house plants.

All children who wish to compete in the children's class for house plants should be at the Library at 7 o'clock. Mr. Paton will provide young plants and soil, and there will be new pots, of the correct size, for sale at 10 cents each.

Alex. Mitchell has donated a cup for competition in this class, which should stimulate considerable interest.

The public are cordially invited to this evening's meeting.

LOCAL NEWS

Charles Linn was home for the holidays.

Dick Gaetz, who has been teaching at Bawlf, is home for Easter.

Mrs. H. F. Kenny is spending a few days with friends at Bentley.

Miss Reece, of Calgary, was the guest of Mrs. D. Pyke over Easter.

Harry Evans, who is teaching at Castor, was home for Easter.

The Best Furniture Co., Ltd., retire baby carriage wheels.

Miss Summerhayes spent Easter with Mr. and Mrs. A. C. Collier, High River.

Mrs. (Dr.) Dorsey and children are visiting Mrs. Dorsey's sister at Midland, Ont.

Mrs. R. C. Neal and little son, of Sylvan Lake, are guests of Mrs. H. S. Strong.

Darwin Houston, of Bowden, and Cecil Houston, of Camrose, were home for Easter.

Miss Mildred Pyke, of Calgary, and Miss Doris Pyke, of Olds, were home over Easter.

James Cruickshank carried off a couple of prizes with his Clydes at the Calgary Horse Show.

Robert Hewson, M.D., and Mrs. Hewson, of Rimbey, were in the city over Easter, visiting relatives.

J. Arthur Carswell returned from High River on Sunday. He expects to take up survey work in the near future.

The anniversary supper of the Methodist Church will be held in the Church basement on May 1st, at 6.30 o'clock.

Mrs. N. M. Burnett arrived home last week from Regina. She was accompanied by her sister, Mrs. D. P. McCall.

Evan Galbraith is home from Nordegg, owing to the mechanical department of the mines being held up by the strike.

Nature intended that you should eat what you want. You can do it if you take Tanlac. Gaetz-Cornett Drug & Book Co.

Special for Saturday, at the Dairy Products Creamery, Strawberry Sherbert, per pint brick, 20c. Take one home—you will like it.

Mr. and Mrs. C. F. Carswell, of Rimbey, and Mrs. A. Wood and family, of Penhold, were visiting Mr. and Mrs. J. A. Carswell over Easter.

Alan Galbraith passed through on Friday from Camrose Normal School, where he has graduated, to take a school south of Bow Island.

F. V. Murgatroyd, who went to the Old Country in December, 1920, has just returned with his bride, and will take up his residence at Hillsdown.

The North Red Deer Community Club will hold a Hard Time dance and box social in the municipal hall on Friday, 21st inst. Everybody welcome.

Mrs. John McVicar was in Calgary last week as a delegate to the Provincial Convention of the Woman's Missionary Society of the Presbyterian Church.

Mrs. W. Gunn, who has been the guest of her son, Mr. D. J. Gunn and Mrs. Gunn for the past year, left on Wednesday on her way to Toronto. Mrs. Gunn went with her as far as Winnipeg.

N. White has booked passage for the Old Country in June, on business of importance calls him across the sea. All persons desiring his services as auctioneer should get same cleared up before that date.

There will be a box social and dance under the auspices of L.O.L. No. 2864, in the Orange Hall, this (Wednesday) evening. The "King Billy Boys" are sure going to have a good time, and everybody is invited.

Mr. N. White and Mr. Geo. Simons returned Wednesday from attending the Life Underwriters' Convention at Calgary. Major Lister was also down. The Major leaves Saturday for a brushing up artillery course at Winnipeg, preparatory to Artillery camp at Red Deer.

At a recent re-organization meeting of the Board of Trade, Rocky Mt. House, W. C. Kirby was unanimously elected President. Chas. I. Edwards, 1st Vice; Robt. McLaren, 2nd Vice; and R. R. Hagerman, Sec.-Treas. The officers are all live wires and will be sure to keep their town on the map.

Eber Crummy, who recently completed the Normal course at Camrose, left yesterday to take a school in the Coronation district. Accompanied by his wife and son, he spent Easter with his parents here. Mrs. Crummy will remain in the city for a couple of weeks before proceeding to their new home.

Invitations have been issued for the marriage of Miss Gwynnyfred Craig, eldest daughter of Mr. and Mrs. W. M. Craig, 135, 14th Ave. West, Vancouver, B.C., to Mr. Howard Ruskin Gaetz, of Red Deer. The wedding will take place April 24th, at 5.30 p.m., from the home of the bride's parents, in Vancouver.

The marriage of Miss Edith McKinnon, to J. F. Dodge, Spirit River, Alta., will be solemnized at 2.30 this afternoon at the home of the bride's parents, Mr. and Mrs. D. W. McKinnon, Clearview. Rev. N. D. Keith will perform the ceremony. A number of guests from Edmonton, Lesliieville and elsewhere have gathered for the happy event.

SERIOUSLY ILL

J. F. Goring's condition was still serious at last reports. Mrs. Goring, however, appears to be making very satisfactory progress toward recovery.

J. F. Day has shown considerable improvement in the past week, was much better on Monday, but not quite so well yesterday.

All these cases are attracting widespread sympathy and interest.

CONDOR NEWS

Owing to Mr. Ralph Patterson leaving the district and resigning the presidency of the U.F.A. Local, it was necessary to elect a new president, and Mr. Scott Hastie was elected.

On Thursday morning, there was a large gathering at Condor to bid farewell to Mr. and Mrs. Patterson. After a short concert, Mr. H. Meeres expressed the regrets of the district at losing such justly popular settlers and wished them every success and happiness in their new undertakings. This was followed by the hearty singing of "He's a jolly good fellow" and much hand-clapping. Mr. Patterson replied as well as his overcome feelings would allow, and dancing was resumed till almost daylight.

There has been quite heavy falls of snow, and it will be some days before the land is dry enough to start seeding.

Stewart Meeres arrived home from the Camrose Normal School with a first-class teaching certificate last week.

Mr. Bell paid a short business visit to Red Deer last week and looks much better for it.

Mrs. Sears, of Nanton, President of the U.F.W.A., paid a visit to Condor last week and organized a U.F.W.A. Local with Mrs. Scott Hastie President, Mrs. Norman Eastman Vice-President, and Mrs. Gyedhill Secretary-Treasurer.

EDWELL

The bazaar, supper and concert got up by the Ladies' Aid Society came off on the 5th inst., and was a grand success. About $96 was taken, which will leave a good margin for future work, after the payment is made on the piano in the school house and all other incidental expenses are met. The bazaar sold many beautiful articles of clothing and fancy work, and was well patronized. The supper left nothing to the desired. The bazaar and supper were at Mr. Comie's home. A long and varied programme was well received in the school house, which was crowded to the doors. Thanks are due to those from Willowdale, Grassy Lake, Horn Hill and Hill End who ably assisted local talent.

School is closed for a week of Easter holidays.

Collections taken in the school house two Sundays, April 2 and 9, for the Russian Famine Relief Fund, amounted to about $54. This will save the lives of a number of suffering children.

Another little daughter has recently come to stay at the home of Mr. and Mrs. Arthur Hoskins.

Never mind! It will stop snowing sometime.

SAVE THE CHILDREN FUND

The following donations have been received since last week towards the fund for starving children in Russia:

Mrs. T. J. Percival	$1.00
Mrs. F. W. Galbraith	$2.00
G. W.	$3.00
A Friend	$3.00
T. Hives	$1.00
Addie Hives	$1.00
	$11.00
Previously acknowledged	$90.00
	$101.00

April 13th, 1922.

John A. Carswell, Esq.,
Editor and Proprietor, The News.
Red Deer, Alta.

Dear Sir:—

I am pleased to acknowledge the receipt of your second remittance on account of the Save the Children Fund, amounting to thirty-three dollars ($33.00).

Yours truly,

R. M. GEMMELL.

CAN WE AFFORD IT?

Here and there an individual is found who "can't afford" to contribute to the Save the Children Fund; yet three cents a day, the price of a newspaper, will save a child in the famine districts of Russia.

Can we afford to refrain from succoring these innocent women and children? The saving of the thirty-three millions of people in Russia is every man's job. A few dollars from each family in Canada will go far to bring life to millions of these distressed people.

We who have never known famine cannot afford to sit idly by and close our ears to the moans of the dying and our eyes to the pictures of emaciated women and children whose misfortune is that they happen to be in a country less favored than our own.

Send your subscription to this office, when it will be acknowledged, or to Sir George Burn, Treasurer of the Save the Children Fund, Elgin Building, Ottawa, or through your church, or other local organization. All amounts, however small, will be thankfully received.

Sheline is paying 25c per lb. for horsehair (mane and tail).

Films developed free. 6 prints, any size, 25 cents. 24 hour service.—Central Finishing Co., Camrose, Alta.

A joint meeting of the U.F.A. and U.F.W.A. of Crossroads will be held in the Crossroads school house next Friday evening, April 21st. As large a meeting as possible is requested, as there are matters of much interest to be discussed.

FIRE DESTROYS FARM HOME

While Mr. and Mrs. T. A. Flood, living two miles south and one-half mile west of Evarts, were on their way to the post office on Friday afternoon, their home was completely destroyed by fire.

The fire was discovered by Lambert Boles, who lives about a mile away. Mr. Boles phoned an alarm to the neighbors, and then proceeded to the scene of the fire, where he did everything that was humanly possible to save some of the effects. In a final effort to enter the burning building, he was overcome, and had to be dragged out by a couple of boys who had also arrived on the scene.

Mr. Flood is a returned soldier, wounded in the war, who holds his land under the S.S.B. His wife came to this country as a bride about a year ago, and was one of the delegates to the recent Soldiers' Wives' convention, when she made many friends. Practically all their personal effects are burned with the exception of the clothes they wore. The house was insured, and will doubtless be replaced by the S.S.B., but as there is no insurance on the contents, they are left with very scanty comforts.

This seems to be a case where practical expressions of sympathy would be appreciated. The News will be glad to receive and forward any donations that our readers would like to make for the encouragement of this veteran of the war and his wife, who are trying to establish a home for themselves.

Chas. Payne, of The News staff, spent Easter in Calgary.

Miss Edith Code, of Calgary Normal school, is home for Easter holidays.

Miss Ella Botterill is spending Easter vacation with friends in Calgary.

The Best Furniture Co., Ltd., do picture framing well and reasonable.

Departmental business took G. W. Smith, M.P.P., to Edmonton last week.

H. G. Scott, barrister, left last week for a visit to the coast on business.

Miss Florence Lund returned from Spokane last week, where she had been attending school.

Mrs. Geo. F. Ely left Monday to spend a few weeks at the Coast. Mr. Ely accompanied her as far as Calgary.

Mr. Finn, assistant secretary of the town of Vegreville, was an Easter visitor with Mr. and Mrs. T. S. Miller.

Miss I. R. Strong very successfully passed her exams at Calgary Normal school, and is home for the Easter holidays.

Miss Cole and Miss Myrtle Smith, of Camrose Normal teaching staff, and Miss Beesle Code, who is attending Normal, were home for Easter.

From coast to coast Tanlac is known and honored and millions have taken it and pronounced it the greatest medicine of all times. Gaetz-Cornett Drug & Book Co.

The W.A. of St. Luke's will hold their Easter bazaar, including morning and porch dresses, fancy articles, tea, home cooking and candy, in Alexandra hall, on Saturday, April 22nd, from 3 to 6.

Mr. and Mrs. Clarence Smith arrived from England on Friday morning last. They are being congratulated by a host of friends in and around Red Deer who wish the happy couple much happiness in their wedded life.

Dr. Crummy, of Red Deer, will address the members of the Crossroads U.F.W.A. at the home of Mrs. E. Glasson on Wednesday afternoon, April 26th. Members are asked to make a special effort to attend, as we feel that no one can afford to miss this opportunity of hearing so able a speaker as Dr. Crummy.

By common consent, the sidewalk at the north side of the post office is the dirtiest to be found anywhere in the business section of Red Deer. Snow banks were allowed to remain there long after they disappeared from almost every other place, and as they melted they left an accumulation of silt that has remained as perpetual mud. The citizens will be glad to see the thing cleaned up by somebody.

Residents of West Park have a grievance. During this muddy weather they are compelled to wade through the slush as best they can, without any semblance of a sidewalk or crossing. The west side of the C.P.R. tracks. This is particularly disagreeable for children on their way to and from school. The people think that as they pay taxes, taxes, and municipal district taxes, and trade in the city, that they are entitled to some consideration. Possibly the two councils interested could get together on this matter.

CARD OF THANKS.

I wish to take this opportunity of expressing my great appreciation of the careful and sympathetic treatment received while confined in the Red Deer Memorial Hospital for a couple of weeks with an attack of pleurisy.

I want especially to thank the matron, the nurses, and Mr. Taylor, the orderly, for all their kindnesses to me. No one could be more thoughtful and considerate than they were at all times, not only to me but to all patients alike. The people of Red Deer are fortunate in having such an institution with such an efficient staff for the relief of sickness and suffering. I also wish to thank Drs. Collison and Sanders.

Thanking you, Mr. Editor, for your space, I am, yours truly,

J. F. KRAUSE.

REX THEATRE NEWS

Tonight and Thursday, Wm. De Mille's big picture, "After the Show," will be screened.

Friday night only, the McDonald Academy, Calgary, present "The Calgary Kiddies."

Saturday only, in three performances, 2.30, 7.30 and 9.15, Dorothy Dalton will be seen in "Moran of the Lady Letty." This picture is highly commended by Red Deer people who saw it at the Capitol in Calgary a few weeks ago. Don't miss this one.

Monday will be "Family Night," when 50 cents will admit father, mother, and all their children. 18 years of age or under who are living at home and are not married. It will be a regular bargain day for some folks.

Tom Moore in "Beating the Game" will be the feature picture for Monday and Tuesday.

A. H. MOYES PASSED AWAY THIS A.M.

A. H. Moyes, one of the best known and highly respected business men in Central Alberta, passed away at 2 o'clock this morning, after a gallant fight of a little over a week, during which time he had two operations.

As manager of the Campbell, Wilson & Horne Wholesale Grocery, and in his capacity as a citizen, he has endeared himself to all the people of Red Deer, who will extend heartfelt sympathy to his sorrowing family in their bereavement.

Funeral announcements will be made later.

G.W.V.A. ANNUAL EASTER BALL

There was an attendance of about 200 at the G.W.V.A. annual ball on Easter Monday. The proceeds on this occasion were for the benefit of the Hospital Ladies' Aid funds and should net a very fair sum.

The Armoury was profusely decorated with streamers of red, white and blue, while the orchestra booth was specially decorated with the emblem of the Red Cross in evidence. A large collection of war trophies were on display at the west end of the building. Bone's orchestra was in excellent form, and the Ladies' Auxiliary ably sustained the enviable reputation they have for providing a bountiful supply of tasty refreshments.

The dance programme was unique, and was designed by England & Haxte:

1. Over the Top Waltz.
2. Siege of Liege Circle One-Step.
3. Battle of Marne Fox Trot.
4. Messines Ridge Waltz.
5. Bramshott Fox Trot.
6. Vimy Ridge One-Step.
7. Lights Out Moonlight Waltz.
8. Cambrai Fox Trot.
9. Sick Parade One-Step.
10. Verdun French Minuet.
11. Ploegsteert Fox Trot.
12. Cook House (Supper) Waltz.
13. Staples Waltz.
14. Passchendaele One-Step.
15. Albert Fox Trot.
16. Somme Waltz.
17. Gheluvelt One-Step.
18. 51st Division Highland Sch't'se
19. Lens Fox Trot.
20. Watch on the Rhine Moonlight Waltz.
21. Mont St. Eloi Quadrille.
22. Canal Du Nord Waltz.
23. Mons Fox Trot.
24. Blighty (Home) Waltz.

SPRING STYLES AT JACK FULTON'S

One of the features of the Easter trade in Red Deer was the display of new Society Brand clothing shown by Jack Fulton. When seen by The News, Mr. Fulton was delighted to note the improvement in the quality of the fabrics this spring. The clothes and patterns are equally as good as in pre-war times, with the prices very little higher than they were then.

The styles in men's clothing have changed considerably this year, the tendency on the whole being toward plainer designs.

In hats, the Brock and Bosalino makes show narrower brims and lower crowns, with quite a run on welted edges. Various shades of fawn and brown predominate, the tendency being toward softer colors.

Narrower ties in club stripes and diagonal stripes, also pure silk knitted ties prevail, rather than the flowing ends of recent years.

The new Kant-Kreaze soft collars and the new Archer collars are on display. The old reliable Invictus shoes bring a good volume of trade as heretofore. The new stock of Forsyth top shirts show the tendency to narrow stripes and quieter patterns.

Fulton's store had a real Easter atmosphere, which indicates the return of pre-war conditions in the clothing trade.

Miss Ardena Baker, Miss Della Hope, Miss Alta Russell and Miss Loveland were all in Red Deer over Easter holidays.

The I.O.D.E. will serve a May day basket tea, on Tuesday afternoon, May 2nd, in Alexandra hall, from 3 to 6. Price 25 cents. Everybody invited.

"I have sold over 2,000 bottles of Tanlac and have never had a dissatisfied customer," writes Smiser's Drug Store, Columbia, Tenn.—Gaetz-Cornett Drug & Book Co.

WONDERFUL DISPLAY AT W. E. LORD CO.

Probably no place in Alberta outside of the larger cities could boast the display of the finest seasonable goods that were on view in Red Deer during Easter week.

The W. E. Lord Co. had a particularly fine showing, their stock having been supplemented just before Easter by shipments of the very latest fabrics, which Mr. Lord had selected personally during his recent trip to the East, when he visited Montreal, Toronto and other manufacturing centres.

Seen by The News on his return, Mr. Lord declined to be drawn into any discussion of business conditions in the east, but was very enthusiastic over the goods he had secured there.

In ladies' clothing, tweed suits divided the honors with the more staple serges and tricotines. There was quite a run on tweeds for up-to-the-minute sport stuffs, but that should not be taken to mean that the sales on tweeds and novelty cloths predominated by any means.

In dresses the smartest garments are made of novelty materials, such as silk sponge-ratine and ratineau, also in very high shades, opposite in the brighter colors, taffetas, canton crepes, tricolettes, voiles and organdies.

Bright coloring features all ladies' garments, in which this store had a particularly fine and varied display.

Stripes and gingham checks in wide ribbons, are in vogue. Exquisite dress materials were there in individual lengths, which, with the use of Belroyle addition to Belroyle Pattern, could be transformed into nifty garments with very little experience. Ostrich boas to match tweed suits are very popular this season.

While the smartest and most up-to-date were in evidence, the most moderate-priced and practical every day stuff was not overlooked.

In the millinery department, ostrich trimming is in demand, also the scarf and hat to match. Blue and canna shades are in evidence, also black lizerie ribbons and crowns. Transparent mohair and lace hats for summer will be worn largely. Flowing veils on sailors in new shades, plain outing and staple hats, also kiddy stuff, are here in infinite variety.

In shoes with individuality, hosiery, dainty ties, collars and other wearing apparel, the display in the store and in the neatly dressed and attractive windows had to be seen to be appreciated. The ladies were not slow to avail themselves of the opportunities of inspecting these goods.

BRUMPTON & GAETZ REPORT GOOD RUN OF EASTER TRADE

Had an Attractive Display of Easter Goods, and Report a Very Satisfactory Volume of Trade.

One of the most noticeable Easter features was the fine display of dainty waists, which show a very marked reduction in price, quality considered. There has been a remarkably good sale of ladies' coats this spring, and a particularly active demand for sport skirt lengths.

Fancy flannels for outing dresses at fairly reasonable prices have been very popular with buyers of seasonable goods.

The stock of ladies' trimmed hats at this store has shown more careful selection this season, and the department has been exceptionally well patronized.

Ladies' oxfords and pumps are particularly popular, and there has been nice business in boys' footwear with a better selected stock and lower prices.

Mr. Gaetz was particularly gratified to note the superior quality of this season's serges. The old qualities are scarcely in sight.

Mr. Gaetz is particularly pleased and gratified with the generous courtesy and the splendid spirit of co-operation with which the public have greeted the inauguration of the cash system by this store a short time ago. It is an indication of the real progressiveness of the people that they are able to fall in line with such a policy so readily.

Mr. Gaetz has seen so many years of development in the Red Deer district, and has seen times when the people were really hard up, that he cannot fail to be optimistic over the present outlook, with the firm conviction that the worst is over and that Central Alberta will come back strong.

C. P. R. GUARANTEES CONNECTION

Winnipeg, Man., April 17.—A guaranteed connection between trains and steamships bound for Europe has been announced this week by Canadian Pacific railway officials at Montreal. Under the new arrangement this guarantee of connection with steamships is extended more surely to travellers from points further west. If any of the trains bearing steamship passengers are delayed in arrival at Montreal, the steamship will be held two hours if by doing so the passengers can embark at that point. If the delay is longer the ship will proceed to Quebec and there await the delayed passengers. Transportation will be arranged from Montreal to Quebec for passengers booked to sail from Montreal. Company officials announced further stating that when a passenger boards a train on the Canadian Pacific that is due to connect with a company steamship at Montreal or Quebec, he is stepping on the gang plank.

ENTOMBED IN AN ICEBERG FOR A THOUSAND YEARS

Startling Discovery Which Came When the Grand Floe Drifted Ashore and Revealed a Picturesque Viking Perfectly Preserved.

Drifting for ten centuries through the uncharted seas north of the Arctic Circle, traversing heaven knows how many thousand miles of snow and silence, perhaps pushed by the ever-grinding ice-floes to the North Pole itself, the body of a Viking king a thousand years old has been returned at last to civilization.

Encased from head to heel in a frozen winding sheet that preserved it more perfectly than any Egyptian mummy, the Viking's body was discovered by Danish doctors standing upright in a huge iceberg cast up on the east coast of Greenland.

It towered before their amazed eyes like an incredible phantom—seven feet tall, clad in rude ancient armor, gripping spear and shield, head crowned with the winged helmet of Norse royalty, the whole dimly visible within the transparent tomb of ice.

Men with axes chopped away this natural casket. Then the Viking stood as unmarred by time as though he had died but yesterday. He was not dried or shrunken. The skin was white and firm. The hair of the head and the bushy moustache was long and red and silky. The iceberg had kept him imperishable for posterity.

The body is being taken on a ship to Copenhagen. There scientists will endeavor to perpetuate the process of preservation by the injection of chemicals. If they are successful, the body of the Viking king in the Copenhagen museum will be the most remarkable relic on earth. Millions will come to stare at the Norsemen who lived and loved and fought a thousand years ago.

While Copenhagen scholars impatiently await the arrival of the extraordinary find they have dispatched an expedition to Greenland to continue excavations. Word has reached them that seven more bodies, as untouched by the years as the first, have been found. Further explorations may give science the most valuable light it has ever had on the Norsemen and their voyages. The early history of America may be rewritten before the investigators are through.

Already they are considering a theory that the Viking with his royal winged helmet may be no less a celebrity than Lief Eriksen, "Erik the Red," famed in saga and rune as a dauntless voyager, believed by many historians (who base their assumption on authentic findings) to have landed on the shores of America four hundred years before Columbus steered the "Santa Maria" into harbor at San Salvador.

"Eric the Red," according to Norse legend, was an earl banished to Greenland because of his secret romance with his liege lord's beautiful daughter. He was a great fighter, a great lover, a great adventurer. After settling at Brattelid and building seventeen dwellings (foundations of which were unearthed a few years ago), he heard from his uncle, Bjarni, a noted navigator, of a vast new land to the southwest.

Erik followed the lure of the unknown. By the account of his voyage preserved in Norse story, historians judge that he finally reached what is now Cape Cod Bay, sailed along Scituate Beach past Coronet Rock into Boston harbor, and thence up the Charles River into the Back Bay, where he landed near Cambridge and built a large house.

The archaeologists have found to confirm this legend ruins of various dwellings, fish pits, canals, bowls, stone sinkers for salmon fishing, a marble cup, all of unmistakable Norse origin. The family of Eben Norton Horsford, on whose property these tokens were unearthed, erected a statue of Lief Eriksen in Faneuil Hall, Boston.

"Erik the Red" left a small colony of Vikings in the new world and sailed back to Greenland. There he died—violently, as became a king. The old sages tell how he and his fellow chieftains pledged their last "skoal" in foaming horns of mead before they roared forth to battle against an alien invader. But, before the raider was driven into the sea, his arches and spearmen slew "Erik the Red" and many of his warriors.

They buried Erik according to Viking custom, in full armor. His helmet, with its twin wings and its gold encrusted lining, was upon his head. His shield was buckled on his arm and his javelin was in his hand, that he might be fit to sit with the high gods. Buried with him were those of his companions who had fallen in battle.

But the earth was not their grave. They placed the body of Erik and those other bodies in galleys. They rowed out to the ice floes grinding past the Greenland coast. In niches carved deep into the ice they laid the dead Vikings; then watched them disappear—slowly, majestically—into the red eye of the sunset on their long journey to Valhalla.

Thus, sing the old sagas, passed "Erik the Red" in the year 922 A. D. or thereabouts. Now, a thousand years later, the icy mountains of the Arctic have given up their secret of the centuries.

Years passed. In the steady, ceaseless grind of the floes immense chunks, mountain tall, were broken off, to become icebergs at the mercy of ocean currents.

By what freak of ocean, wind and tide the iceberg containing these eight bodies was brought to that particular spot on the Greenland coast, only Providence knows. But eventually—possibly after completely circumnavigating Greenland—it was thrust up by the waves onto a lonely promontory on the southeastern seaboard.

Here the iceberg may have rested years before a human being passed that way. Even did some lonely hunter come upon it, he might have missed the bodies buried in its side. Only gradually did the iceberg melt under the action of sun and wind until the helmeted chieftain was visible for the first time in a thousand years, through the thin sheet as through a window.

The discovery of the Vikings by the Danes came about through an unusual chain of circumstances. For many months Eskimos, coming into the settlements, had brought ghostly tales of a spectre-haunted point on the lonely east coast. But white men paid little attention to the stories. They were used to such superstitions in the frozen North—legends of beach-walkers and dune-haunters; of the ghastly "Yoo-Hoes" that stalk the trails of hunters; of the phantom crews of lost ships heard in the night whistling—not singing, but whistling—for the soul of the man who steered to their doom. This rumor of a fair-skinned, red-haired giant staring out of the side of an iceberg seemed but another yarn.

Then, at the kryolite mines at Ivigtut, an epidemic of scurvy broke out. The Danish government sent a party of physicians to the town. They heard the story of the phantom giants in the iceberg, and the more adventurous spirits of the party proposed an expedition.

The young doctors set out more in fun than in earnest. They believed they were stalking a ghost. But, guided by Eskimos, they stumbled at the end of their journey on the find of the century—the Viking king, entombed for a thousand years, released from his icy casket by their swiftly chopping pick-axes for the first time since he set forth for Valhalla in the dawn of the tenth century.

History has no episode that rivals the strange discovery. Only in fiction can anything similar be found, and that in a novel of a dead generation. "The Frozen Pirate," fantastic narrative of a South Pole expedition, tells of a pirate who was found frozen in a chunk of ice, who was thawed back to life, who took again to murder on the high seas, and who was finally refrozen and retombed that the Sapish main might be saved from his bloody hand.

To that extent is fiction, in this case, stranger than truth. For though his body in perfect condition may draw the scientists of the world to Copenhagen, no human hand will ever wake the soul of Lief Eriksen—if it be he—from his sleep of a thousand years.

FAMOUS SPY IS CONDEMNED TO DIE ON GALLOWS.

Mons, Belgium, April 5.—Armand Jeannes was condemned to death in the court here last night for treason and espionage against Belgium and her allies during the war. The prisoner had boasted that he was instrumental in bringing about the arrest and execution by the Germans of Edith Cavell, British war nurse, but this charge was not mentioned in the indictment against him.

There was a burst of applause in the court room when the sentence was passed, and a great crowd outside jeered Jeannes as he was taken to the death cell.

M. D. OF ARTHUR

A meeting of the Council of the M.D. of Arthur, No. 340, was held in Innisfail on April 3, with Reeve J. H. McArthur presiding; Councillors Parcell, Quantz, Oakes, Moffet and Hibbert present.

The communication from Salvation Army was tabled.

Moved by McArthur that all persons complained against as having stinkweed, be notified to destroy same. Carried.

Moved by Oakes, that J. Tyler be refunded 67 cents, penalty on Municipal Tax. Carried.

Moved by Oakes, that the Secretary send amounts due each month to the Workmen's Compensation Board. Carried.

Moved by McArthur, that the matter of classification of road east of Innisfail be taken up with the Department, and W. E. Truemah, secretary-treasurer, Pine Lake M.D., be written to to that effect. Carried.

A bylaw was passed granting the Council power to borrow $2,000 from the Canadian Bank of Commerce.

Bills were presented as follows:—Jas. McKenzie, pound fees, $6.65; N.E. Sparks, D.R.O. Div. 2, $12; Robt. Larratt, D.R.O. Div. 4, $12; rent for poll, $4; Mrs. Hayden, rent for poll, Div. 2, $4; A. G. Roper, D.R.O. Div. 3, $12; A. K. Hutchinson, D.R.O. Div. 1, $12; Jas. McKenzie, rent for poll, Div. 1, $4; T. H. Jacobs, rent for poll, Div. 3, $4; H. J. Saturley, rent for Poll, Div. 6, $4; phone, $6.50; H. P. Domoney, rebate on Hospital bill, $7.50; Western Municipal News, supplies $54; Advocate, $3; Mrs. Jenson, light, $1; Live Stock Commission, brand books, $87; coal and wood, $10; Attorney-General, Mothers Allowance, Mrs. M. Jenkins, $15; Province Printers, $106.40.

Paysheets—Otto Krause, Div. 4, $18; C. A. Holt, Div. 3, $5.70; C. W. Rear, Div. 4, $17.50; Otto Krause, Div. 3, $64.80; Otto Krause, $12; Oakes, Div. 4, $6.

Moved by Hibbert, that all bills and paysheets be passed as read and paid. Carried.

N. RED DEER COUNCIL

The regular monthly meeting of the Council of North Red Deer was held Monday evening at 8 o'clock. All members of the Council were present, Reeve Webb presiding.

The following accounts were presented and ordered paid:

Registrar for abstracts of title, $17.50; Postmaster, for stamps, $7.00; News Publishing Co., $12.50; City of Red Deer for school taxes collected, $33.94; Western General Electric Co., Ltd., $6.50; Advocate, $35.62; Attorney-General of Alberta for Mothers' Allowance, $82.50; L. J. Porter, for affidavits, $1.00.

The Village has been paying the school taxes for a number of years on lot 1, block 9, North Red Deer, in order to keep the property in good standing for a French reservist. As it is understood this party does not intend returning, the Council ordered that he be given notice that unless he redeems this property, on which a small house stands, before July 1st next, that the property will be sold for the taxes.

The Council decided to sit as a Court of Revision on Wednesday, May 3rd, at 8 p.m.

Clean-up Day for the Village was set for May 1st, on which day the village will provide teams free of charge to remove ashes and rubbish of all kinds, except manure, if placed in a location easily reached by the teams.

The flag pole will be placed on the village office, and necessary sidewalk repairs will be attended to at once.

The new maid was in many respects quite satisfactory, but the mistress had observed that Biddy, in her dusting operations, always missed a beautiful statue of Venus, says the Pittsburg Chronicle-Telegraph. "Biddy," she said one day, "why don't you dust this figure? She could stand a good dusting!" "Bejabers," replied Biddy, "I have been thinking for a long time, ma'am, that she should be covered with something."

New Spring Goods

A visit to the **Boot and Shoe Department** will reveal some money-saving opportunities.

For instance, you will find some **Children's Elk "Stitchdowns"** on sale at **$2.95**

Some **Fine Kid and Patent Misses Shoes** (broken sizes) high top, with pillow soles, formerly priced at $7.50, clearing at **$4.95**

Some broken lines in Ladies' high priced two tone 14 inch top Boots. Formerly priced as high as $18.50. Clearing at **$4.95**

Women's Brown Oxfords, Recede toe, military heel, for.... **$4.95**
Women's Glazed Kid Oxfords, military heel, for **$4.50**
Women's Brown 2-strap Oxfords **$5.00**

FARMERS' INTEREST IN FOREST PATROL

Forest Patrol in Southern Alberta is of greater importance than the patrol of most forest areas. The object is not principally the preservation of timber but the preservation of our agricultural industry.

First, because the loss of these forests would make our climate drier.

Second, because the loss of these forests would greatly reduce the waters available for irrigation.

Our climate until recent dry years was one ideal for grain crops. We had plenty of rain in May and June, dry weather in August, September and October. Scientists tell us rain is produced by the chilling of air compelling it to give up the moisture it could hold at a higher temperature. Our spring rains, when we get them, are produced by the condensation of the moisture in the air blown by east and north winds. When against the snows of the mountains these winds prevail the chilled area spreads back further east and the rain covers a greater area. The snow preserved from rapid melting by the forests is our condenser. Remove the forests and the snows go out in April; remove the condenser and our rains cease.

Irrigation will be developed within the next twenty years to the limit of available water. Already systems are in use which depend on the storage of flood waters. Remove the forests from our watersheds, and not only will the snows be diminished by the mild spells of winter, but the spring melting will be much more rapid, our water will go over the dams instead of into the reservoirs, and the waters for irrigation be inadequate. Our springs and underground water supplies all depend on the waters conserved by these forest areas.

Owing to the dryness and strong winds of Alberta's climate fires are a greater than usual menace to our forests. About one-third of the area has already been burned.

Forest areas in mountainous districts such as ours when once burned over suffer greatly from erosion. The steep slopes are quickly deprived of their shallow soil by the rush of water resulting from storms. Deep channels are cut which result in more rapid drainage and especially in a comparatively dry climate like ours insufficient moisture is left to support the growth of new trees. Experts state that such an area burned over twice is impossible of reforestration.

Owing to the mountainous nature of the forest area of Southern Alberta patrol by rangers to be effective would be extremely expensive. Fires might originate within a mile of a ranger and never be discovered till they were beyond control.

The record of the air patrol during the last two years speaks for itself in regard to how effective it has been.

In 1920 the station was started at Morley, and for two months the Bow River Forest Reserve was patrolled as far north as the Clear Water River. About 10,000 square miles were observed daily and the average distance of flight each day was about three hundred miles. Probably largely due to the moral effect of the patrol upon campers and others, no fires broke out within the reserve, though several were reported outside the reserve and several occurred in the Crows Nest Reserve which was not patrolled that year.

The Forest Patrol of 1921 was conducted from High River, and both the Bow River and Crows Nest Reserves patrolled daily excepting when weather made flight impossible. 25,000 square miles were observed each day and the average daily flight was about six hundred miles. The total mileage for the season was about seventy-two thousand miles; total fires reported fifty-one. No fire got beyond control excepting the Alison Creek fire which originated in British Columbia many miles from the patrol area and was reported by the patrol three days before it entered Alberta. During the fight to extinguish this fire the planes for days furnished the only available information regarding the condition of the fire in a great deal of the area covered by it.

The moral effect of the patrol upon campers and others in our forest area is undoubtedly very great, and the reports from the planes record all camps observed and all movements of camps.

The patrol will now be assisted by the radio phone instead of by wireless telegraph, making it possible to use one-man planes at considerably less expense and risk, and also making it possible to have rangers posted long distances from the commercial telephone, where, by furnishing them with a small receiving set and by their being in attendance at fixed hours during the day, any fire in the neighborhood can be reported direct from the Air Station.

ROD AND GUN FOR MAY

Sportsmen and lovers of the great out of doors will not want to miss the May number of Rod and Gun in Canada, which contains a wealth of attractive features. There is a short story masterpiece by the well known fiction writer, Harry M. Moore. It is among the best Mr. More's facile pen has produced, and those who read it will not forget it quickly. There are other stories, including "The Imp of the Trail" by F. V. Williams, and "An Angler's Dream" by I. Todd. A trio of topnotch articles will also be found. C. N. A. freeon contributes an interesting, illustrated article "Hunting the Rocky Mountain Goat," while Bonnycastle Dale's article is well up to the usual high standard of all his work. The magazine also contains the first announcement of the new photographic department, which will doubtless prove a popular feature. The Guns and Ammunition department and Fishing Notes are particularly interesting and bright, while A. Bryan Williams and J. W. Winson contribute two splendid articles in "Rod and Gun Notes in B.C." Rod and Gun in Canada is published monthly by W. J. Taylor, Limited, at Woodstock, Ontario.

FARMERS' INTEREST IN POTATO GROWING IN DISTRICTS WITH SHORT SEASONS

(Experimental Farms Note)

When growing potatoes in districts with short seasons, attention naturally centres upon means to forward development. These are:

1. Thorough preparation of the soil and good cultivation until blossoming.
2. Selection of a warm, early soil and a frost-protected site.
3. Choice of early varieties.
4. Sprouting before planting.
5. Early planting.
6. Using good sized setts and spacing liberally.

Other things being equal, a sharp slope, a high local elevation and probably a southwestern aspect are to be sought. Proximity to open water is of great advantage in warding off late-spring as well as early-fall frosts.

A potato patch surrounded by a summerfallow or any patch of bare ground is safer from frost than one bordered by scrub, grass or grain. A half-rod width of bare ground surrounding the patch is a decided protection, at least to the two outer rows.

Growers who prefer a medium-late variety for general use are well advised to plant a proportion of some good early kind such as Early Rose or Early Ohio.

Bringing the seed potatoes up out of the root cellar about the first of April and exposing in shallow trays in a light warm place, so that tough green sprouts will form, is of very decided advantage. It is supposed to be best to expose them at first in a cool place so as to toughen the skin and restrict the number of eyes that start, but this detail of the method is not always convenient to observe and is not absolutely essential.

The Beaverlodge Experimental Station, in common with many observant settlers, has had excellent results from planting setts with white cellar sprouts attached. However, these are rather easily broken off or mutilated, and careful experiment shows that the green sprouts are better. Either green or white sprouts are of decided advantage in forwarding development and maturity.

Four years' trial at Beaverlodge has given the largest yield from planting around or before the first of May. In seasons of early Fall frosts much the highest starch content has been obtained from the crop of early plantings. In certain other years rather better flavor and table quality and nearly as large yields have been secured by planting at a medium date. In 1921 a July frost hit most severely to early sorts and early plantings, owing to their being in the blossoming stage. It is best not to risk all the seed in the one very early planting, especially if one is using only a precocious sort. A degree of caution is advisable, although, as a rule, medium-early planting is safest, say the first to the tenth of May.

Very shallow planting gives the earliest crop, and usually the largest yield, but the quality is below par, sun-burn more abundant, red discolouration of the flesh of certain kinds such as the Rose is more marked, and frost injury to the tubers in autumn is more likely. Planting in a four-inch trench, covering lightly at first and gradually drawing in more dirt afterwards has points to commend it.

Silo Talk No. 1

What Five Acres of Sunflowers (with a Silo) will do

The Product of Five Acres of Sunflowers—

WILL FEED at least 20 cows for a whole winter.
WILL RELEASE 40 to 50 acres of forage crops for grain growing.
WILL INCREASE the milk flow per animal by 4 quarts per day during the winter.
WILL REDUCE your present feed costs by HALF, whether you keep a few or many stock.
WILL SO ADD to the condition of the animals as to make steers ready to market long before grass-fed steers are ready, and provide for sale of same at prime-fed prices.

These are FACTS of experience which farmers who fed Sunflowers last year PROVED. If YOU are looking for these benefits—and you will agree that they are worth getting—you can get them next fall by PLANTING SUNFLOWERS THIS SPRING and

WEDNESDAY, APRIL 19th, 1922.

TARIFFS

The United States administration has presented its tariff bill in the Senate, and the Canadian Government will find itself in the throes of a budget debate within the next couple of weeks, unless all signals fail.

The tariff will be fully discussed on both sides of the international boundary, not as an academic theory, although idealists will doubtless be found in both nations who will insist on imposing their Utopian dreams on an all too-credulous public; but it will be discussed in the light of national demands and their imperative dictum. In every Dominion election, Canadians are entertained with learned oratorical effusions on the merits of free trade, but the din of political warfare scarcely has time to die away before the theory of free trade becomes a fond memory, more honored in its breach than in its observance.

At times Western Canada has been so carried away with the popular cry for free trade, that the newspaper which dares to uphold the idea of protection is looked upon with suspicion as if it were a traitor to the interests of the community. But what man is there today who can forget the political clams that bind him, and still seriously advocate free trade as a sane policy for Canada at the present time?

Look across the line where the Administration has introduced a tariff bill that makes the once-famed Fordney Emergency Tariff and the more recent Payne-Aldrich Act look like free trade in comparison. The proverbial Haman's Gallows sinks to the level of a soap box. In many instances, the new tariff makes the importation of products into the United States prohibitive. Listen: Wheat, 30 cents a bushel; flour, 78 cents a 100 lbs.; oats, 15 cents a bushel; oatmeal, 90 cents a hundred; cattle, ½ to 2 cents per pound; fresh beef, 2½ cents a pound; butter, 8 cents a pound; horses, $30 per head to 20 per cent.; potatoes, 58 cents a 100; hides, greet., 2 cents a pound, dried, 4 cents a pound; wools, 35 cents a pound.

Who is responsible for this? The farmers of the United States, who have given this as their answer to the reciprocity and free trade proposals of their Canadian neighbors. The American farmer of today is a very practical type of being who makes a study of facts and draws his own conclusions.

The United States is faced with the fact that her export trade continues to decrease. For the month of March it went down $54,000,000 as compared with March, 1921. Some of this may represent not a decrease in tonnage, but a decrease in the price at which the surplus of raw material and food prducts had to be sold.

During the same month, however, the imports to the United States increased about $6,000,000, which shows that, in spite of the severe suppression of imports by legislative action, international trade is struggling to restore the balance so rudely upset during the war, when the United States lent enormous sums of money. That is to say, it exported enormous quantities of goods which were not paid for except by its own government, out of the proceeds of bonds sold to its own people.

The natural result of the war loans would be to greatly increase the imports and decrease the exports till the prodigious credit balance had been adjusted to normal proportions. But, the United States does not approve of imports as a matter of national policy, for the country has an exportable surplus over its own requirements, and to encourage further imports would have the effect of demoralizing the home market.

Hence, while the debtor nations may be in poor condition to pay their debts to the United States, that nation is in an even worse predicament if it tries to accept payment of the debts.

There is no such thing as money in international trade. Money is purely a national convenience to facilitate domestic exchange. The accounts between nations are barter balances, which may be settled for the time in three ways: First, kept on the books to be liquidated later in goods; second, paid in gold by weight; or, third, transformed into long term bonds, the interest on which is paid in goods. Gold in excess of what is required for its manufactures and currency is of no possible use to any country, except to purchase goods abroad, hence the potential payment for all exports must be in imports convertible to the uses of the people and cannot be in anything else.

The real significance of the American high tariff is an attempt to prevent the nation's creditors from paying off their debts. An effort is being made to fund the debts and merely receive the interest, but even this must be accepted in imports. All of which goes to give credence to the argument that the American people would be better off if the United States, in common with all other nations, would write off all war debts and let trade resume its normal movement.

With the flow of exports from the United States dammed up, as it were, by the low exchange rate prevailing in European countries, the criminal folly of Canada opening the flood gates for American exports to deluge the country is evident. Canada of all countries, which has an exchange not so very far short of the American standard.

Since the United States, with a population of 100 millions, finds it necessary to protect its basic industries, and since the representations of a professedly low tariff Canadian government have failed to bring any concession for Canadian products entering the United States, no government in Canada can be foolhardy enough to remove the tariff barriers and leave 9 million Canadians at the mercy of a trade-thirsty world.

The News ventures to predict that, allowing even for the influence of Western Progressives, the King government will not reduce the tariff any more than the Laurier government did, or than any other government will till the whole world assumes a much more Utopian aspect than is evident at the present time.

The tariff is the one defensive weapon of international trade and must exist as long as boundary lines divide nations, just as line fences will be built and maintained as long as private ownership of farm lands is the custom.

FARM PRICES IN 1920 and 1921

Canada's wheat crop for 1921 is now placed at 300,858,100 bushels. This was harvested from 23,000,000 acres, and shows an increase in yield of 14 per cent. over the records of the previous year.

However, the value of the crop ($243,000,000) is 43 per cent. lower than in 1920, and well illustrates the drastic decline in price received by the Canadian farmer for his wheat.

Our oat crop shows a yield of 426,232,900 bushels, as compared with 500,709,700 in 1920. Barley and flax yields were smaller in 1921 than in 1920. Potatoes show a drop from 133,831,400 bushels in 1920 to 107,246,000 in 1921, while the average price per bushel was 20c lower in 1921, which made a decrease in the value of the crop of over $47,000,000.

To a very large extent what was true of field crops was also true of live stock, and 1921 will be remembered by the farming community as one of the darkest years in the history of the industry. It is encouraging to know that prices are on the mend, and that things look considerably better for 1922. While this year will not be a record-breaker in regard to prices, it is a certainty that it will show a decided improvement over the low levels of 1921.

Increased prosperity for the farmers will mean increased prosperity for all, as the more money a farmer receives, the more he will spend for machinery, clothing, household utensils, and everything else connected with his industry.

AUSTRIA AND THE HAPSBURGS

The death of ex-Emperor Karl of Austria-Hungary recalls the tragic fate of the Hapsburgs and the plight into which they dragged their country.

Austria-Hungary started the war because a Hapsburg prince was assassinated by a Serbian. She was going to make mincemeat of her little neighbor and extend her dominions, but in the end the once-powerful empire was torn asunder, stripped of most of its territory and became a bankrupt nation. The old Emperor Franz-Josef died during the war, and his successor, Karl, was driven from his throne at the end of the war and died in exile.

In the pre-war days Austria-Hungary had a population of 51,000,000 and an area of 116,000 square miles. To-day Austria has a population of but 6,000,000 and an area of only 32,000 square miles. Worse even than the loss of population and territory has been the forming of new boundaries which were drawn by the Allies without any regard to economic conditions, and as a result Austria is hemmed in by a ring of unfriendly nations with adverse tariffs. She is entirely shut out from access to the sea, and has been deprived of the areas which formerly contributed foodstuffs and raw material to feed her people and to keep her factories going.

The Hapsburgs started the war, but it meant their downfall and the disruption of their country. Unfortunately it has also brought death and disaster to many nations and individuals. None, however, have suffered more than Austria and the Hapsburgs who started the struggle.

WEEKLY NEWS FROM EDMONTON

ROAD PROGRAM FOR YEAR

Following conferences with the various road engineers of the Provincial government, Hon. Alex. Ross, Minister of Public Works, has announced plans for road building under the new Highways Act for the coming summer. The new organization will involve several important changes.

The services of forty road foremen who were doing duty under the old system, will be dispensed with entirely. The roadwork will be under the supervision of practical road engineers, well qualified for the work. The system of road foreman will disappear. This will afford a very large saving in administration since the work of the road foremen in the past simply duplicated the work of the foremen engaged by the municipalities themselves. The money thus saved will be utilized on road work generally.

The province is to be divided into ten districts with a road engineer resident and in charge of each district.

Plans for carrying out the work this year may be summarized as follows:

The proposed Highways Commission will not be appointed for some time. The appointment of the Highways Commissioner is still under consideration, there being many applicants for the position.

Main Highways: These will continue to be built and developed as before. One road engineer will be placed entirely in charge of main highway work, since this work has grown to very large proportions. There are now 3600 miles of main highways in the province. This includes main highways running eastward from the C. and E. to the eastern boundary of the province, a main highway north and south through the province, and main highways northwest of Edmonton, west of Calgary and west through the Crows Nest, and other main roads.

Municipal Roads: All roads within the municipal districts must be built by the municipalities themselves, under supervision of government road engineers. The grants will be paid these districts by the government but not until the roads have been built according to a certain standard, and approved by the government engineer of the district.

In unorganized improvement districts, or unorganized territories the Government will have charge of building the roads, which will be done under the supervision of the engineers.

It is the purpose of the government to encourage market roads, thus extending the facilities of the farmers in marketing their produce.

The question of securing the federal grant for highways is still under review by the government. In order to get as early a start as possible on the roadwork, the road engineers have now returned to their various districts and are making preparations for the summer's work.

Commissioner Alfred Cuddy, who since 1919 has been Commissioner of the Alberta Provincial Police, has resigned that position to accept the position of Assistant Commissioner of the Ontario Provincial police.

At the Calgary spring cattle show this year 355 bulls were sold at an average price of $111.17, and a total value of $39,645.00.

The new government farm just north of Edmonton, which will be in connection with the new home for mental defectives, is to be under cultivation this year. Of the 1000 acres included in the farm 400 will be cultivated this year.

The Holstein herd at the Stoney Plain farm will be moved to this farm, and later the poultry demonstration plant, so that when the new home for mental defectives is completed, there will be a ready supply of the best milk and eggs, two of the chief articles of diet for patients in such a home. Work on the new home is to start this year.

Announcement has been made that two of the schools of agriculture, Youngstown and Gleichen, the two latest to be established, will be closed temporarily, owing to the small attendance at these schools. It is also announced that the Department of Agriculture will reduce two or three of the demonstration farms to experimental plots, the larger portion of these farms having been sold. Steps have already been taken to dispose of some of the demonstration farms at Stoney Plain. The Department, however, will put these farms in crop this year. The reduction of these farms to experimental plots is in line with the general policy of appointing agricultural district agents, at each place where a demonstration farm is located. The superintendent will be continued, but in the capacity of agricultural agent, who will visit the farmers in the district, and will help them to solve their own peculiar problems right at home. In addition sufficient ground will be retained at the demonstration farms to carry on certain experimental work. More district agents will be appointed at different points in the province.

Attendance at the agricultural schools, each of which have a capacity of 150 students, was as follows for the year 1921: Olds 114, Raymond 56, Claresholm 49, Vermilion 45, Youngstown 41, and Gleichen 32.

Members of the equalization assessment board of the Province have taken up headquarters in the Provincial Parliament buildings, and are engaged now in planning a program of meetings at which they will hear appeals from the equalized assessments of the rural districts, towns and villages throughout the Province. This equalization was completed and the report issued last year.

Already a considerable number of appeals have been received, chiefly from Southern Alberta. These are now being gone over by Messrs. Jackman and Donahoe, the two members of the board who will do the investigating and who will hold sessions at various points to hear the appeals. The other members of the board who assisted in the equalization of assessments were J. H. Lamb, Deputy Minister of Municipalities, who was chairman, Sam Ferris, of Edmonton, and W. D. Spence, who is now Tax Commissioner of the province, and will likely not act any further on the board.

The office of the Recorder of Brands for the province is being removed from Medicine Hat to Edmonton, and will be located in the old legislative buildinggs near the capital buildings. James Wilson, the brand recorder, will make arrangements shortly to move his staff. This office has been located in Medicine Hat since the early ranching days but with the increase in the livestock industry in the northern part of the province it has been found advisable to centralize the office.

Farm Operations: Work on the land was started last week in several localities of the province, and in some places some seed was put in, but the heavy snowstorm of last week put a temporary stop to operations. The wet snow, which fell very heavily in the south, and also to a certain extent in the north, has added much needed moisture to the soil.

RETURNS TO THE LEGISLATURE

A return to Mr. Milnes shows that the government in 1921 paid $38,253.08 for legal services aside from the employees of the Attorney-General's Department. Such services included legal services in prosecution of special cases, etc. Agents of the Attorney General's department in prosecutions were paid $27,050.42 during 1921, and in the police courts of Edmonton and Calgary agents of the Attorney General were paid $3905.00.

E. B. Cogswell, Crown Prosecutor, Edmonton, was paid $7106 and James Short at Calgary paid $6970. The appointment of R. A. Smith as general solitor for the department will obviate much expenditure in this way in the future.

A return to Mr. Milnes shows that the total assessable lands in the province is 38,265,748.81 acres, of which the equalized value for assessment purposes is $602,256,069.71, an average per acre of $15.49. The supplementary revenue tax on the total acreage of farm and ranch lands was $1,204,512.14. The revenue on taxable lands is not yet available. The same return shows that in 1921 there was voted $350,000 for main highways maintenance and $115,842.83 was spent; for main highway construction there was voted $1,000,000 and $625,940.85 was spent; for local and district road maintenance there was voted $300,000, and there was spent $653,364.23.

A return to Mr. Buckley shows that on the "Cow Bill" there had been loaned to March 15, 1922, a total of $1,799,322.00, and there had been paid a total of $401,617.23. The outstanding principal to this date was $1,397,704.77, and outstanding interest was $93,214.33 to Feb. 28th. There are 803 associations under the bill and the number of cattle bought to December 31st, 1921, totalled 27,811. A total of 952 have died. The line of credit extended by the Merchants Bank totalled $1,525,000. Under the bill there had been loaned for feed $21,836.43, and repaid $2,676.84. There have been applications for feed totaling $2500 this year.

"THIS IS "BRUNSWICK WEEK"

Model No. 200 - $135. Model No. 207 - $165 Model No. 210 - $200 Model No. 212 - $250 Model No. 117 - $325

Announcing
Reduced Prices
On All New Models of The
Brunswick Phonographs

WEDNESDAY MORNING AT 9 A.M. a general price reduction on all new models of Brunswick Phonographs will go into effect. These new prices represent actual savings of $10.00 to $100.00 from the prices of TODAY.
Although there has been an actual shortage of most models of the Brunswick for the past six months, and the demand for some models still exceeds the supply, yet the Brunswick Company are making this big price reduction NOW for the sole purpose of maintaining the Brunswick as the—

Greatest Phonograph Value in Canada

During this entire week we will present in our store a
Special Floor Exhibit
—at which will be revealed all the exclusive features of the Brunswick that have combined to make it "All Phonographs in One." Here will be explained to you, in detail, the principles of Brunswick Reproducing methods, including the Ultona, All-Wood Oval Horn, Tone Control, Motor, Cabinet, Construction, etc. Don't fail to visit this exhibit and learn why the Brunswick is superor. Whether or not you wish to purchase, you are invited to attend and should find it very interesting.

$10. CASH

$10 will place any Brunswick Phonograph in your home

To insure the success of Brunswick Week, and make it the biggest in our history; to make the price reductions doubly effective and to spread the popularity of Brunswick ownership, we are going to make a remarkably liberal offer through which $10.00 CASH will place any Brunswick Phonograph in your home.

The balance of the usual first payment need not be paid for 30 days, and we will extend one entire year to complete payment. This will make it possible for any family—every family—who wants real music in the home to take advantage of these price reductions and secure a beautiful new model Brunswick NOW. There are no strings or restrictions to this offer. It is genuine. But it is limited to this ONE WEEK ONLY.

Act at Once

Call early tomorrow. Be the first to secure the reduced prices. You will never forget the day a Brunswick is added to your home. Delay may mean disappointment.

ROCKY MOUNT'N HOUSE

April 12, 1922

J. S. Olson is a business visitor to Red Deer this week.

W. J. T. Strong is holding an auction sale today in the village for L. Bratton and Wm. Arftman.

The snowstorm today is the heaviest in this part of the province since May 3, 1919. The land should certainly have sufficient moisture this spring.

Mr. and Mrs. J. H. Bertrand returned on Monday evening from their winter's trip to British Columbia and California, and both are looking well, but think there are worse places than this.

We are sorry to report the death of Chas. Hankinson, of Dovercourt, last Friday morning. Mr. Hankinson took a hemorrhage about 8:30 and died about twenty minutes after. The deceased was in the forties and was one of our oldest pioneers, coming to this part of the province and settling at Dovercourt fourteen years ago where he cleared up one of the best farms in his neighborhood, and had his buildings fitted up modern, with electric lights, etc. The deceased carried mail from here to Dovercourt, Stauffer and Caroline for four years, and last year opened a store at Dovercourt. He leaves to mourn his death a widow and small children, the Hankinson family of this village, Mr. and Mrs. Driscoll, and other brothers and sisters, besides a host of friends. The remains were interned in the local cemetery on Sunday afternoon, a large number of friends being present.

Thos. R. Dalgliah will again operate the C.P.R. pump at Sylvan Lake and this point, during the summer months.

The local I.O.O.F. Lodge will hold the 103rd anniversary of the Order in their hall on Sunday, April 30, at 2:30 p.m. Service will be conducted entirely by brothers of the Order.

Claud Scott is fitting up a radio station at this point. We wish our young friend every success.

The officers of the "1952 Club" do not seem to take a very active part in any of our meetings that stand for progress.

The Willing Workers' Association are showing the great story of the far north in the Passtime Theatre this and tomorrow evening. On the evening of April 26 and 27, in the same Theatre, they will show the greatest and latest story written by Zane Grey, "The Man of The Forest." No one should miss seeing this. The prices are moderate and an orchestra will be in attendance. The young people certainly deserve great credit for putting on these shows.

We understand that next week, and during the summer, the C. N. R. will run their mixed train from Big Valley to Nordegg, as they did before last summer, owing to the miners' strike.

La grippe has been going the rounds in this vicinity, but we are pleased to report everyone getting nicely over it.

Bert. McLeod is home for the summer from Nordegg.

Mr. and Mrs. B. W. Allen moved to their lately purchased farm at Sylvan Lake yesterday. Mr. and Mrs. Allen are of the early pioneers here; Mrs. Allen came here with her family, the Dudleys, in 1910, and Mr. Allen came in the fall of 1911 as bookkeeper for the firm of Fraser & Gaetz. Mr. Allen was Justice of the Peace and Notary Public, selling out his business to R. R. Hagerman last fall. They were the second couple to be married in this vicinity. Your scribe may be old-fashioned, but we always hate to part with the old familiar faces. However, Mr. and Mrs. Allen have not moved so far away but that we may expect to meet them once in a while. Their many friends wish them success in their new home.

FAMOUS AVIATOR KILLED ON EVE OF HIS WORLD FLIGHT

London, April 13.—Sir Ross Smith, the Australian aviator, who with his brother, Sir Keith, had planned to start from Croydon on April 25 for an attempted flight around the world, was killed when his plane crashed in a practice flight at Brooklands today.

Lieut. Bennett, an engineer, who was planning to accompany Sir Ross and his brother around the world, also was killed.

The machine which crashed was the one the Smiths intended to use in their flight. Capt. Conkerill, of the Vickers company, had previously flown it for half an hour, then handed it over to Capt. Smith.

As the machine was approaching the aerodrome to land, it got into a spin and the fatal crash followed.

MADE LONG FLIGHT

Capt. Sir Ross Smith sprang into prominence in the world of aviation in 1919 when, accompanied by his brother, Sir Keith, he made the flight from England to Australia, 11,500 miles, winning a prize of £10,000 from the Australian government as the first aviators to accomplish the England-Australian flight. Both aviators were knighted for their feat.

Capt. Smith, who was killed in today's crash at Brooklands, saw distinguished service in the European war, first with the Australian Light Horse in Egypt and Gallipoli, and later as an aviator with the Australian flying corps in Egypt and Palestine. He was one of the British army aviators who in December, 1918, made the first flight from Cairo to Calcutta.

M.D. OF HAYS

The second meeting of the Council of M.D. of Hays was held at Lousana on Friday, April 7, with all Councillors present.

Mr. G. A. Trenaman asked the Council to cancel the survey made on the S.E. 29-36-23-4, as it was not necessary. This matter was referred to the Councillor of that Division, who will report at the next meeting.

A deputation from the Elnora Board of Trade asked the Council to assist them to procure a water supply in the hamlet of Elnora. After much discussion it was moved by Wilton that this matter be tabled until the next meeting. Carried. Ross, Pennock, Wilton and McDonald, for; McRae and Robinson against.

Mr. Trace, representing the Elnora U.F.A., asked the Council to reconsider the gopher question and pay a bounty of 2 cents per tail during the whole season. The Council refused to consider this. As a further step in the destruction of gophers it was moved by Ross that Thursday, April 20, be declared "Gopher day" when all owners and occupants of land within the district shall be required to distribute poison on the said land. Carried.

The following seed grain advances were now considered.

Application from E. Bouvin, Breda, for 25 bushels of oats and 10 bushels of wheat to be sown on the N.E. 5-36-22-4. This was granted on motion of Robinson, and the Secretary was instructed to take the necessary lien to secure the same.

Application from A. S. Brodie for seed to sow 40 acres on the E. half of 3-37-23-4 was granted on motion of McRae, and the Secretary instructed to file the necessary lien to secure the same.

Application from Thos. Kerr for 90 bushels of wheat and 100 bushels of oats to be sown on the N.E. 25-35-24 was granted on motion of McRae, provided we have the written consent of the Canadian Pacific Railway Co. to file a seed grain lien against the said land.

The Sanitary Inspector reported that he had selected a suitable site for the Lousana nuisance ground on the N.E. 27-36-23-4, and it was moved by Robinson that a survey be applied for and that the Secretary write Mr. McArthur the owner of this selection. Carried.

In considering an account of Dr. Gillespie's for $99 for attendance on Ben Lust, of Antrey, it was moved by McRae that we pay one half of this account. Vote stood McRae, Wilton, Pennock, for; Robinson and McDonald and Ross against. Motion lost.

Re an account of Dr. Shaw amounting to $30 for attendance on Fred Terasci, of Ardley, it was moved by Ross that this be disallowed. Carried.

In dealing with an account from S. V. Townshead, of Elnora, calling for $1.25 per mile for road dragging, it was moved by Pennock that we pay $1 per mile. Carried.

Moved by Robinson that the following accounts be passed and paid:—J. L. Raynor, on account Shaw, $23.55; E. J. Hogge, $15.05; Alberta Government Telephones, March, $5.55; H. Kjersten, labor No. 5, $2.75; John Green, labor, No. 5, $11.55; Western Municipal News, supplies, $56.51; Mothers Allowance, $132.50; D. U. Blair, coal, $14; Lloyd Grange, repairs, No. 5, $15.50; Lathom & Collins, repairs, No. 5, $8; W. J. White & Co., rent, $8.10; Lindsey & Moore, supplies, $1.25; R. Needham, labor, No. 5, $20; T. Richmond, labor, No. 5, $5.50; A. L. Kirkeberg, Councillor's fees, No. 1, $13.60; Wm. Gehrke, Councillor's fees, No. 5, $10.90; Delburne Progress, $20.70; Elnora Advance, $5; Wm. Harrison, labor, No. 2, $5.90; Secretary-Treasurer, petty cash, $7.25. Election expenses: J. A. Wood, R.O., $50; W. B. Wood, D.R.O., $6.05; Cornwall Valley S.D., $3; J. M. Graham, D.R.O., $6.55; Trenville S.D., $3; P. C. Hepburn, D.R.O., $7.40; Lakeview S.D., $3; A. G. Smith, D.R.O., $9; Fairbanks S.D., $3; Geo. Paton, D.R.O., $6.20; Wood Lake S.D., $3; R. D. Thompson, D.R.O. $6.60. Total $488.96. Carried.

Moved by Ross that the wages for road work this year be the same as 1921, viz., man and four horses, per hour, 75 cents; man and team, per hour 55 cents; single man, per hour, 35 cents; road foreman, per hour, 50 cents. Carried.

Moved by Robinson that the following surveys be applied for: Between section 27 and 28-35-23-4; between sections 15 and 16-36-23-4 and between sections 29 and 30-35-24-4. Carried.

Moved by McDonald that the next meeting be held in Elnora, the date to be set by the Secretary. Carried.

ROBT. FARRIES,
Secretary-Treasurer

EXAMINER'S REVIEW OF PROVINCIAL MARKETS

Calgary, Thursday, April 13.

Cattle—

Beef—For the week closing April 12 at Calgary receipts had been light and prices on some of the steers and fat cows not just as high as the week previous. Choice heavy steers, $6 to $6.25; choice light, $5.50 to $6; good, $4.75 to $5.50; medium, $3.75 to $4.50; common down to $2.50. Choice cows, $4 to $4.50; good, $3.50 to $4; medium, $2.75 to $3.50; common, $2 to $2.75; canners, 50c to $1.50. Choice heifers, will make up to $5. Bulls, choice, will bring $3.50; medium to common, $1.50 to $2.50. Calves will make up to $7; common, $2.50 to $4. Feeders and Stockers—Trading light this week, but choice feeders will make $4 to $4.50; stockers from $4 down. Stocker heifers, $2.75 to $3.50; stock cows, $1.50 to $3.

Beef—Prices at Edmonton steady on beef and on good stuff stronger, with good choice heavy and light steers in demand; choice heavy, $5.75 to $6.25; choice light, $5.50 to $6; good, $5 to $5.50; medium, $3.50 to $4; common down to $2.50. Choice cows, $4 to $4.50; good, $3.50 to $4; medium, $3 to $3.50; common and canners down to $1.25 to $2.50. Choice heifers will make $5.25. Not many bulls, with range on tops $2 to $2.50; common down to $1. Calves scarce and choice veal at premium, $7 to $8; common, $3 to $4. Stockers and Feeders—Demand better, with choice feeders, $3.50 to $4; stockers, $2.50 to $3.50. Stocker heifers, $2.50 to $3.50. Stock cows, $1.75 to $2.25. Hogs—

Selling started at Calgary Wednesday at $12. Thursday's arrivals made $13 to $12.10.

Hogs—Prices have been advancing at Edmonton, with Wednesday's sales $11.75, and market looks strong. Sheep—

Receipts light this week at Calgary; choice feed lot lambs last week and made $12; best sales so far this week, $11.50, with quality not just so good as last week.

Sheep—Receipts light at Edmonton; choice lambs will bring up to $11; wethers, $7.50 to $8.50; ewes, $5.50 to $6.50.

Grain—

Wheat prices have been running higher during the week, but there does not appear to be any certainty to the market. The advancing season on this continent is likely to play a considerable part in determining values. U.S. winter wheat reports are very conflicting, but the crop is likely to be better than was expected. Canadian conditions look favorable for spring, at least so far as districts where lack of moisture affected the crops last year. Practically no seeding yet in Alberta, though some attempts have been made to get on the land.

Produce—

Eggs—Good retail demand and storing now being general have advanced Calgary prices to 22c to 24c; too many small, dirty eggs coming in. Creamery Butter—Unchanged, with cartons 40c and 36c for No. 1 and No. 2; no export surplus yet in southern part; specials in solids probably worth 37c. Dairy Butter—Very light movement; fancy table from 30c down. Butterfat—Receipts showing moderate increase; prices likely to hold for a few weeks. Poultry—Premium paid on good chickens, 16c to 20c live; fowl, 12c to 15c. Potatoes—Cars on consignment bringing around $18, if good; low grades at any price; get seed potatoes in time.

Produce — Butterfat — Edmonton territory not getting much increase; prices unchanged at 33c, 30c and 27c. Creamery Butter—Good demand, but no outside orders filled yet; prints quoted 39c, and cartons 40c. Cheese—Good demand for Alberta make, and if quality maintained will hold; large, 20c; twins, 20½; triplets, 21c. Eggs—Large receipts and active consuming demand; not much storing yet; quotations from $6.25 to $6.50. Poultry—Receipts very light.

Hay—

Prices unchanged; dealers paying farmers $12 to $14 country points on upland; timothy, $18 to $19; free freight is off after April 30.

Furs—

Manufacturers, holding off buying and until spring auctions are held, markets will be weak; spring rats now $1 to $1.40; lynx, $10 to $24; mink, $2.50 to $6; these are some reductions.

Hides—

No improvement in trade outlook; green salted butcher hides, 3c.

BACK TO WORK AGAIN —

—quite rid of an obstinate wound or other disabling injury. Wouldn't it make any man feel thankful toward Zam-Buk? A 50c. box of this wonderful healer is, to the wage earner, as good as any accident insurance policy. Cuts, wounds, burns and scalds can't fester or become inflamed or poisoned where antiseptic Zam-Buk is promptly applied.

"I was back at work in a week thanks to Zam-Buk, though the doctor was sure I would be laid-off for a month" says Mr. H. Hogben, 358, Beverley St., Winnipeg. "My hand caught in a revolving belt, and three fingers were badly mangled. After one week's use of Zam-Buk the wounds were well healed. It was worth three weeks' wages to me."

Mr. C. Oakley, of Saskatoon, Sask., says:—"Down at the stoneyard, I cut my leg badly. A doctor sewed up the wound and attended me for five weeks. It had cost me $40 when I determined to try Zam-Buk. In two weeks 1 dollar's worth healed the limb splendidly."

Zam-Buk is equally valuable in eczema, acne, ringworm, ulcers, piles, abscesses, bad legs, etc. Purely herbal, it's a most wonnerful skin remedy.

Zam-Buk SAVES MONEY

LOST ONE LEG IN RUNAWAY ACCIDENT

Thos. Stamp, aged about 40, who served in the war and took up land in the Great Bend district northeast of Delburne, met with a very serious runaway accident on Tuesday as a result of which he was so badly injured that his left leg had to be amputated above the knee at the Memorial Hospital on Tuesday night.

Mr. Stamp was getting into his rig when the horses became startled and dashed off. Mr. Stamp's left leg being caught in one wheel. The horses dragged him for three quarters of a mile when one of the lines caught and turned them into the fence. When he was found, his left leg was terribly broken at the knee, the bone protruding and the end all broken from contact with the ground. Every stitch of clothing was torn off him except his pants. Had it not been that a young lad who was on the farm with him witnessed the runaway, it might have been that Mr. Stamp would have lain where the horses stopped for some time, as they had taken an unfrequented road. The Jacques-Orme ambulance brought him in to the Memorial Hospital.

Mr. Stamp's wife is in the old country.

FARMERS!

Bring or ship your Cream direct to our Creamery.

With the contemplated improvements to our plant, we will be able to give the very best of service, which will be reflected in the size of your Cream Check.

GRASSHOPPER MENACE

By Frank A. Skelborne.

Do you realize what this means?

How many persons in Alberta have ever been through a real serious locust plague?

I doubt very much if there are one hundred people in this vast province of ours, who have any idea of what might happen this year in the southern portion of Alberta.

Now this article is not meant to alarm any individual; it is simply a warning; outside of a few people who know what the real facts are in regard to egg deposits, the rest of the population is asleep. Fortunately the Greenfield government has come to life, and at the last sitting of the legislature they passed an act entitled "An Act for the extermination of Agricultural Pests," and voted $70,000.00 to fight it this year.

Now mark you, this menace has been constantly on the increase since 1918, the first dry year after the wet ones. About this time the locusts left the banks of the rivers and small streams, because of the dry spell. They migrated to the growing fields of grain which provided them with an abundance of soft, succulent feed, and as they were not very numerous, very little damage ensued, but—they stayed there; and finding the hard sod along the roadsides and fence lines to their liking for breeding grounds, the result was they deposited their eggs, which were fully hatched in 1919, another dry year; and they laid their eggs in the summer of that year, all over Southern Alberta.

1920 was the fist bad year in a few localities; but outside of one or two municipalities, unfortunately, very little was done to check them.

Last year, practically the whole of Southern Alberta, from the international boundary as far north as Olds, and east to the Saskatchewan boundary, was infested with billions of locusts and the egg deposit was enormous.

Even as far back as the spring and summer of 1920, the writer saw in one locality (roughly speaking about a township in extent) locusts so thick that on a rock about a foot square there were over three hundred. It was a common sight to see six on a blade of wheat, and they cleaned, absolutely, a field, sixty acres in extent, in less than ten days.

My attention was drawn to another field of wheat, about one hundred acres in all, which was eaten bare for twenty rods into the field from the roadside where they had hatched out; quick action with about one hundred pounds of poisoned bait saved this field from annihilation. In three days it was very hard to find one live locust in that wheat field, which proved to my entire satisfaction that poisoning does the trick.

MAGIC BAKING POWDER

Magic Baking Powder has been known and used all over Canada for more than 25 years. It has set and maintained the standard for goods of its class. Its use is increasing daily because of its strength, purity and universal satisfaction

Pure food insures good health.

Magic Baking Powder insures pure food

CANADIAN MADE

E.W.GILLETT COMPANY LIMITED
TORONTO, CANADA.
WINNIPEG, MONTREAL.

About eight tons of bait was distributed in that particular township, and the crops were saved from entire destruction, but the yield of wheat was cut down about ten bushels per acre, on the average over this particular section of country.

As the summer advanced and the locusts attained the flying stage, less damage was reported; but one farmer in the same township put in twelve acres of winter rye in August; about ten days later the field was a lovely green; two days later it was bare; the farmer thought it had died from some obscure cause; it died alright, the locusts did the trick.

You see what happened was this: The green fields were turning a nice golden color, they were no longer green; the heads were filling, the only green patch in the township was that twelve acres of rye, and every flying locust that was left alive simply went over there to have a soft, succulent meal; that's all.

In late May and early June of this year, along the roadsides, fence lines, and in the pastures, billions of little black jumping locusts will come to life. From the day they are born until about 40 days later they will have but two objects in life—to eat, and rest at night.

They eat continuously from about fifteen minutes after sunrise, until sunset, which means roughly about 14 hours per day, they are out in your grain fields, eating, eating, eating; once a week they moult, and with each successive moulting their little wings grow larger and larger, until after the fifth moulting they are ready to fly, and breed.

After attaining the full wing stage, they still eat, but they go further afield for it; poisoning is not as effective as when they are in moulting stage.

Starting on the edge of your fields when they are two or three days old, they work steadily forward; and soon the green tender shoots of grain begin to disappear, and the farmer wonders whether that grain he sowed first germinated properly or not. Don't wait at all if you see this happen; investigate without delay, walk along the edge of your fields, examine the ground, and you will find little jumping locusts as you take your steps, small little insects about the size of a pea, mostly black in color, and looking at your grain you will find the blades of wheat eaten away, and the stalks cut off short with the ground; this is the early work of the locust.

Report the matter promptly to your Councillor or Reeve, and see to it that you procure a supply of bait, AT ONCE, and distribute it along your fence line and the borders of the field where the damage is, put it out on some bright morning, about sunrise, and in three days you will be reasonably safe.

Here is something about the habits of the locust.

When he leaves his egg casing for the outside world, like all tiny, newly born insects he is very tender, and he wants warmth; this he must have, especially at night time, and so in the early stages of his existence, although he is very busy during the long, sunshiny days, at night he hunts cover; quite often then he comes back to the roadside to lie under dried grass and leaves, weeds and rough sod, or lumps of earth, and there he lies dormant with the cold until the early morning sun has sufficient power to warm his stiffened body; then he wakes up and the first thing he wants is something to eat.

Poisoned bait is made so attractive that it looks good to him, so he makes a meal right on the spot, and if he does not die then, he goes out into the grain fields for a little green feed, and as a rule he does not come back. In his early life he dies quickly, a few hours does the trick; as he grows older it often takes three days, but he dies eventually.

Now you see the reason why poisoning to be effective must be done in the early morning, and in the early stages of his existence. Don't mistake me, it is effective later on, but it takes more and it is a slower process; if you wait until the locusts are two or three weeks old, they have developed sufficient wing power by that time to be half way across a field, and they won't bother to come back to the roadside at night time—any old shelter is good enough then; but there is a vast difference between poisoning a strip along a fence, or the edge of a field, and the distribution of bait covering half a section of land; it takes too much time and is very costly.

Look for egg deposits now; dig in your pastures along the edge of sloughs, fence lines, road allowances, any place where grass grows, and the ground is hard, is the place where eggs are deposited; they look like grains of wheat, and are usually about half an inch to an inch below the surface; get the children on the job, and if you find any egg deposits report the fact to your Councillor, and watch your grain adjacent to the deposits when it appears above the ground.

We are likely to have them for the next two or three years. A wet year won't harm them, neither will a cold spring with lots of snow; the only thing we can do is to poison them now, and wait for the parasites which are their natural enemies, but it will take some time yet before we can hope for much help from this cause.

Alberta is an ideal breeding ground for locusts. It might come to pass that when the host swarms, the numbers of them will darken the sky, as in Biblical times. There would not be a living green thing left alive which happened to be in their line of travel; even the leaves of the trees would be eaten away, and they would leave behind them a country bare and devoid of vegetation, ruin and starvation in their wake.

There will be enough hatched this year for this to happen.

THE TORTURE OF INDIGESTION

Thousands Made Miserable By This Trouble

"FRUIT-A-TIVES" Relieves It

What is Indigestion and what causes it? As you know, solid food must be changed into a liquid by the stomach before it can be taken up as nourishment by the blood.

The stomach acts as a churn. It is covered by a strong, muscular coat and lined with a soft, delicate membrane which secretes the Gastric Juice which digests or dissolves solid food.

When food enters the stomach, the muscular coat squeezes and presses the food from end to end, or churns it, with the gastric juice to dissolve or digest it.

But—if the stomach muscles are weak—or if the dissolving fluid is poor or insufficient—then food cannot be digested properly and you have Indigestion.

"FRUIT-A-TIVES" is the most wonderful medicine in the world for strengthening the stomach muscles and providing an abundance of pure, full-strength dissolving fluid to completely digest every meal. "FRUIT-A-TIVES" does this because it keeps the kidneys active, the bowels regular and the blood pure, which insures pure Gastric Juice.

"FRUIT-A-TIVES" will correct your Indigestion or Dyspepsia and enable you to enjoy every meal. Try it.

50c. a box, 6 for $2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

DEATH PLEASANT PROCESS, SAYS CONAN DOYLE

New York, April 13.—Sir Arthur Conan Doyle last night described the sensations of the death bed as he said they had been communicated to him from beyond the Styx.

Listening to him was a vast audience, an audience that filled Carnegie hall, an audience many of whose members soon will board Charon's craft for the voyage which all must take. Palsied heads shook with emotion as the earnest words fell from the lips of a man who was turned from medicine and letters to a search for the spiritual.

Death is not painful, but a pleasant process, said Sir Arthur. As death approaches, the soul floats out from its earthly shell, and hovers above the human clay, tethered only by the silver cord of which ecclesiastics speak. The only sensations is one of delicious langour.

A PLEASANT SIGHT

The first sight that greets the eye is one of smiling, loving faces bending over the death bed, continued Sir Arthur.

"Proof?" he asked.

"I have stood by the side of the dying, seen hands turning cold in death stretch out, heard words of endearment fall from lips that soon would move no more. Delirium, say materialists. No, it is not delirium."

"Proof?" asked the preacher of spiritualism again.

"The disengaging of the etheric body can be, has been photographed. I am fortunate enough to have such a plate."

SEA SCENES FILMED UNDER ADVERSE CONDITIONS

Great Difficulties Encountered In Photographing "Moran of the Lady Letty"

Many difficulties of an unforseen nature were encountered by George Melford, Paramount producer, and his cast of players in filming the sea scenes in "Moran of the Lady Letty," featuring Dorothy Dalton, which will be presented at the Rex Theatre next Saturday only.

The company left the Lasky studio in Hollywood, for San Francisco, the original locale of the novel by Frank Norris, expecting to return within three weeks. Instead, they were in the Bay City for more than five weeks making the exteriors.

Many of the scenes were taken aboard two sailing schooners—a three-master and a four-masted ship. These had to be towed out from port every morning to the open sea and towed back in the evening. These operations required from four to five hours each day, leaving about four hours' shooting time daily.

In the morning, when the vessel was being towed out, the tide was coming in, and in the evening, when the company turned the nose of the ship homeward, the tide was ebbing out to sea. Thus it was necessary to "buck" the tide both coming and going, which accounts for the time required to get to and from the outer-sea location.

Then, when the location was reached, if Dorothy Dalton or William Marshall, the camera man, weren't seasick, a few of the highly dramatic scenes of the picture were made.

Railway News in Brief

Calgary.—That the Canadian Pacific would be shipping coal out of the Drumheller district in the course of the next few weeks was the statement made by D. C. Coleman, vice-president on western lines, Canadian Pacific Railway. Mr. Coleman spoke in quite an optimistic view in reviewing present conditions and stated that freight traffic throughout the west showed an improvement compared with the corresponding period last year.

Sudbury.—By April 15th between six and seven hundred men will be given employment on the Sudbury district of the Lake Superior Division of the C. P. R. Of these some two hundred and fifty will be employed at the creosoting plant at Sudbury, which will re-open on April 15th. The balance will be employed on track maintenance and with the bridge and building department.

On April 3rd the C. P. R. started a large number of men at work replacing ties, while later on in the summer considerable rock ballasting will be done.

Winnipeg.—That there is plenty of elevator space on the Canadian Pacific tracks at the head of the lakes to take care of all loading done in the interior between now and the opening of navigation, which will be about April 25 was the statement made by Canadian Pacific Railway officials.

Approximately 285,000 bushels per day of coarse grains as well as wheat are being handled by the company. A percentage of wheat loaded does not reach the head of the lakes, but is absorbed by flour mills at Winnipeg, Moose Jaw, Medicine Hat and Calgary.

Montreal.—The annual report of the C. P. R. issued last week showed gross earnings for the year 1921 of $193,021,854, which were less than those of the previous year by $23,619,494. Operating expenses were $158,820,114 and net earnings were $34,201,740, an increase for the year of $1,048,695. The number of passengers carried was 15,318,358, a decrease of 1,606,691. The average journey per passenger was 89.67 miles as against 92.245 miles last year and the average fare paid was $2.59 as compared with $2.89 in 1920. The number of tons of freight carried was 25,102,821 tons as against 30,160,134 for the previous year. The year's tonnage of freight multiplied by the number of miles it travelled was 11,121,322,012, while in 1920 it was 13,994,508,976.

Vancouver.—Mr. C. A. Cotterell, assistant general superintendent, British Columbia district, of the Canadian Pacific Railway, returned to the city from a trip through Southern British Columbia and over the main line from Field west.

He states that notwithstanding that spring weather is unusually late, there is a marked improvement in business activity throughout the interior. Shipments from the mines are very satisfactory, and there is quite an improvement in the pole and lumber business. The movement of freight in British Columbia shows a substantial increase in comparison with the same period last year.

Just as soon as weather conditions will permit, the railway will be putting on a number of men to take care of the season's track work, which should help the unemployment situation materially.

Vancouver.—After waging warfare ever since the wharfs were first erected, Canadian Pacific officials are of the opinion that they have at last exterminated the thousands of rats that used to infest the neighborhood, causing thousands of dollars damage to freight.

About six months ago the company brought all its artillery to bear in the shape of a specially-prepared poison, which was liberally placed in every runway that could be detected, care being taken to see that dogs could not reach it. Not satisfied with this, a wonderful rat trap, of a pattern that has done great service for the company at other places, was purchased at an expense of $15. The trap was placed in the place formerly most largely frequented by the rodents, the cooperage room. There it remained for a week or more but caught no rats.

The trap was found to be working properly, but investigation showed that the poison had exterminated the rats.

Vancouver officials of the company say they will be glad to give wholesalers and others who are sustaining heavy loss through rat destruction, the benefit of the methods used.

A BAND WITH A HISTORY

That splendid British regiment, the Scots Guards, as they are known today, looks back to the merry monarch, Charles I., as the chief author of its regimental being. In 1649 King Charles authorized the Marquis of Argyle to raise a regiment of 1,500 men to protect the recently planted Scottish colonists in Ireland. It was a fateful beginning. The regiment had its birth in a troublesome job, and has fattened in glory on troublesome jobs ever since. Its history is the history of Britain's wars, and it is a long history and a stirring history, for through all the almost 300 years that have since rolled by, it has been only now and then that the Scots Guards have languished at home in peaceful ease. Their colors have flapped in the bullet-torn breeze of every country, from Hull to Halifax, in which Britain has had a war, and as Kipling intimates, that's a long way if you go in the right direction. If they weren't with Wolfe at Quebec, it was because they were otherwheres engaged in halling down the blessings of British civilization with claymore, bullet and bayonet, and altogether the Scots Guards has taken a giant part in Britain's big and age-long job of making the world safe for democracy.

In the days before Charles and his jovial court, the hard fighting Scots were not popular in England. Their stout blows were usually directed too near home, and if they were to employ their talents to the full advantage it was necessary to go farther abroad. Thus, we find a company of Scottish Guards upholding the national reputation at the court of the French King, Lous XI. When a Scottish King came to England, the Scots Guards followed, and most of them later found their way into Argyle's force, since when the regiment under one name or another has retained its entity, and had added to its standard the names of most of the historic battles of the British army as well as a host of others less well remembered. What the Scots Guards did in the Great War would take columns to tell. The list of their battles is too long to be quoted here. They were an important part of the ever-glorious contemptibles. From 1914 to the end they saw it all. Again and again the Scots Guards came back from the front a tattered remnant of what was once a regiment, and just as often it went back again, stepping blithely into the maelstrom of death and destruction to do or die according to the Scots Guard's standard. The regiment's decorations won during the war included 5 Victoria Crosses, 26 Distinguished Service Orders and 561 other rewards for gallantry.

It is the Scots Guards Band that Canadians are most particularly interested in at this time. They will tour Canada during the present summer, under the auspices of Canada's Great War Veterans, and Canadians will have an opportunity of hearing one of the world's finest bands in concert. This band is itself century old, and critics say it has never before achieved the high level of musical reputation that it now has, under the leadership of Lieut. F. W. Wood, who has won an outstanding position among the world's great interpretative conductors.

This tour was arranged for the benefit of the Great War Veterans' Association, and its purpose is largely to direct attention to the fine work of the Association. An important feature of the tour is the fact that it is under the direction of Dr. Charles Harris, whose unrivalled experience in connection with the British Empire's most important musical undertakings is world-wide in its scope. The band will arrive in Canada about May 1, on the Canadian Pacific liner, "Empress of Scotland."

Offsetting Competition

The thing for the merchants of this community to do in their own interests is to advertise faithfully, and to make their printed announcements interesting and helpful to those whose trade and favor are desired.

The serious competitors of the retailers of this community are the big stores of the big cities—those that send out catalogues and have mail-order departments.

The poorest way to offset this competition is for our local merchants to remain silent. For them not to "speak up" is to give the mail-order houses a better chance to get business from this community.

A WORD TO THE PUBLIC

When you send your money out of this community you enrich the great shops and impoverish this community. Strengthen—not weaken—the merchants of this community. It will all be returned to you in the form of better service and better values.

Be Loyal to Your Own Community

DISTRICT COURT

The spring sittings of the District Court took place last week before His Honor Judge Mahaffy. The following is a report of the proceedings:

Walters v Faucher. Action by P. Walters against A. Faucher, both of Sylvan Lake, to recover $329.50, amount recovered against Walters by P. Herman at the Supreme Court sittings in March, 1922, following Judge Stuart's decision in 1920, and for which amount plaintiff claimed defendant had accepted liability under written agreement. The case was one of the series of lawsuits occasioned by the experiences of the Sylvan Lake threshing syndicate, originally composed in 1911 of Peets, Herman, Kingsep, Walters and Faucher. They bought a Gould, Shapley & Muir outfit, which did not work with them, and they refused to pay the notes. The Gould Co. subsequently recovered judgment for the outstanding balance—against Peets and Herman. Peets died and Herman was saddled with the responsibility of paying the judgment. Herman sued his partners for their share of the liability of the judgment and costs and Faucher and Walters admitted their original liability, but swore that Herman had agreed to take over the Gould engine for the amount of the judgment recovered by the Company. Herman denied this, and Judge Stuart considered the story of Faucher and Walters rather improbable and gave judgment for Herman against them in 1919 for the first notes, and Judge Tweedie, in 1922, gave effect to a consent judgment for Herman against Faucher and Walters on the later notes, with a reference to the District Court judge to settle the question of Faucher's liability for Walters' share of this judgment against them. Mrs. Kingsep's share had been taken over by the syndicate and she was released by Judge Stuart from liability. Prior to these Herman suits, members of the syndicate had bought a Stickney engine and Case separator to take the place of the Gould engine which had failed them, and Mrs. Kingsep subsequently sold her interest therein to Faucher, acting for the syndicate, the bargain being set out by the parties themselves on a half sheet of notepaper which the Judge declared was a clearer agreement than the much longer typewritten one drafted by three lawyers—on Mr. Payne protesting, the Judge amended it to "two lawyers"—and which latter agreement was the subject of the disputed interpretation which caused the present suit. Under this agreement, on payment of $350 by Walters, Faucher assumed responsibility for a couple of specific items, one being a payment on the Stickney engine, and indemnified Walters thereunder against "all liability in regard to the partnership property." Mr. Faucher swore that at the time of the signing of this agreement he had believed that there was no further liability on the Gould Co. litigation, as Herman had assumed the liability and taken over the engine. In this view he had been supported by Walters who, in examination for discovery by Mr. Quigg in one of the several cases, had sworn that Herman had bought the Gould engine and assumed the liability. In giving evidence in court Tuesday, however, Walters said that Herman did not take over the engine, and that he had sworn to that effect previously because he had been advised so to do. The Judge refused to give any further credence to Walters' testimony in the box, and adjourned the court for consultation with the lawyers apparently as to withdrawing the case. Subsequently court resumed, and the defence was heard.

Mr. Crosby argued that the amount paid by Walters under the agreement —$350—was altogether inadequate if the Gould Co. suit liability was to be considered; with that taken into account Walters' liability was some $700 to $800, and Faucher would not assume that for $350. Both Faucher and Walters, according to their sworn testimony at that time, believed that Herman had assumed all the liability of the Gould Co. suits and taken the engine. This agreement consequently was not intended to cover that at all. They must be governed in their interpretation by what was in the minds of the parties when the agreement was signed, by what was in Faucher's mind.

Mr. Payne's contention was that, even if Faucher considered that he and Walters were free of the Gould Co. suit liability of the syndicate owing to Herman taking over the engine, that Judge Stuart had subsequently decided they were not free, that Herman had not bought the engine nor assumed the liability. The amount of this Gould Co. suit judgment was never anything else than a liability in regard to the partnership property, according to Judge Stuart's decision. That being the case, Faucher had indemnified Walters in this agreement against any claim from that source, whether he believed or not that there would ever be any such claim. The agreement could not be rectified unless there had been a mutual mistake, which did not show, nor could it be rescinded because the parties could not be put back into their original positions. In drawing up the agreement, too, Mr. Walters' lawyer had sent out for another lawyer to protect Mr. Faucher's interests in the agreement.

The Judge did not well see why, when certain specific items were mentioned in the agreement, that the Gould Co. suit liability should not have been mentioned, if the agreement was intended to cover that in the general term of "partnership liability." Apparently, according to their earlier statements, both parties believed, when the agreement was signed, that that liability had been assumed by Herman, and was not a factor in the agreement. He would reserve judgment, however, to look up the authorities cited by Mr. Payne. While he was bound to follow Judge Stuart's ruling in regard to the law, he was free to place his own interpretation on the whole of the facts brought out before him in the present suit.

Judge Mahaffy subsequently gave judgment as follows:—

"I find that the defendant Foucher is not liable for the share of the plaintiff Walters, and is not bound to indemnity Walters in respect thereof. Defendant Foucher will be entitled to his costs of the issue."

Mr. Payne appeared for the plaintiff; Mr. Crosby for defendant.

Raine v Brown. Action by Chas. Raine, Alhambra, against T. W. E. Brown, of the same place, for $99, goods and some interest. The defendant did not dispute the account but claimed that plaintiff had agreed with defendant that plaintiff would collect an account against John Volker, Lovalist, which defendant assigned to plaintiff, but which plaintiff had not collected. Adjourned to next Court. Payne & Graham for plaintiff.

Hart v Flett. Action by Walter Hart against John Flett, both of the Red Deer district, for $70, amount for breaking 6¾ acres at $9 per acre, and some work. Defendant said the price of breaking was $8 an acre, and a little less than five acres were broken. Settlement was arranged at $8.50 per acre for the breaking, Mr. Dawe to measure the land. If both parties are wrong in measurement, the costs to be divided; if either is right, the other pays. Mr. Graham for plaintiff; Mr. Quigg for defendant.

Robinson v Robinson. Action from Innisfail to recover loan of some $2,000, referred from Supreme Court sitting, which amount defendant claims was gifts and wages from father to son. P. H. Russell for plaintiff. Payne & Graham for defendant.

H. H. Jamieson et al v Sylvan Lake S.D. Action for over $200 on account. Settled between the parties. John Quigg for plaintiff.

L. Irish v J. F. Goring. Action over claims and counterclaims in connection with renting and operating of the Mechanical Garage. Adjourned owing to illness of defendant. Payne & Graham for plaintiff; Russell & McClure for defendant.

N. WHITE, Auctioneer, Red Deer

NATION BUILDING IN CANADA

Universities to Follow the Railroad in Binding East and West Together For the Cause of National Unity

Hand in hand with the material growth of Canada, with the extension of her population, and the development of her natural resources, moves forward the current of her intellectual and spiritual life. The race of men and women whose adventurous spirit and indomitable courage are making a nation, are not the kind that are content with the merely material things of life. Canada's pioneers of a little while ago were young men who saw visions, and old men who dreamed dreams, and their sons and daughters are no less gifted. Their broadening horizon now includes a new world of mental and spiritual effort in which they, in turn, must be pioneers. The realization of this fact has become a living force in the fine universities that are already doing a great work at Winnipeg, Edmonton, and Saskatoon and Vancouver.

In the making of the Canadian nation so far, avenues of transport and communication have worked towards completion of the structure the foundation stone of which was the Act of Dominion Federation. Canada's national unity is founded and fostered by the political and physical links that bind east and west, but it can be fully developed only when the avenues of Canadian thought move east and west as do those of trade. This is the thought that lies behind the recent donation by the C.P.R. of three annual scholarships of the value of $500 each to Toronto University for the purpose of inducing graduates of Western Colleges to complete their studies at that great Canadian centre of learning.

The universities of Western Canada are growing fast. Their standard of instruction is high, and an ever growing number of their students desire to pursue post-graduate studies beyond the stage now possible at their provincial institutions. Through these scholarships a constant stream of the brightest and most ambitious of western university students will be enabled to spend some time in Eastern Canada and thus become familiar with methods of life and thought there. As stated by Mr. E. W. Beatty, President of the Canadian Pacific Railway, in his letter to Sir Robert Falconer, President of Toronto University, announcing the granting of the three scholarships, "The movement is one that will obviously be of benefit, not only to the students, but also to the communities in which they will afterwards live."

MEIGHEN FAVORS WHEAT BOARD; CRERAR LUKEWARM

Combined Efforts Will Force King to Re-appoint Board—Progressives Growing Angry at Delay.

Ottawa, April 10.—The Conservatives and Progressives have united in urging upon the Government the advisability of re-establishing the Wheat Board.

Ex-Premier Meighen has been especially active in this work. He reminded the House that during the recent election he had advocated the establishment of a Board with ample power to receive, handle and finance all grain committed to its charge. He urged upon the House the necessity of an early solution of the problem, and claimed that if the Government submitted a stated case to the Supreme Court that there would be "a warring clamor of interests before that tribunal."

WOULD CAUSE CONFLICT

The provinces, the Winnipeg Grain Exchange, the millers, the railways and the bankers would all have to be heard. Any might secure a postponement of the hearing to prepare his case and any might carry an appeal from a decision of the court to the Privy Council. Then, again, he questioned if a decision by the Supreme Court would help Parliament to act in a practical way. For that reason, he urged that the report be referred back to the committee, that the committee decide what action it should take in the public interest and report its decision to the House, and that the Government then secure from the law officers of the Crown an opinion as to the length the Dominion Parliament could go in the direction suggested by the committee without exceeding its constitutional powers. Mr. Meighen asserted that the grain trade had reached such proportions in Canada that it should be controlled by legislation enacted by the Dominion Parliament.

AMEND B.N.A. ACT

If it could not be under present circumstances, he would be prepared to support an address asking the Imperial Parliament to amend the British North America Act. Hon. T. A. Crerar said that western farmers had suffered lose last year due to the way grain was handled under existing circumstances. That was one reason why action "along the line of re-establishment of the Canada Wheat Board should be taken."

REVENUE FROM NEW TAXES

Approximately one million dollars is what the provincial government expects to get from new taxes which have been approved by the legislature.

The new tax of two cents a gallon on gasoline is expected to yield at least $200,000 after it comes into effect May 1.

The doubling of the provincial tax on coal by another five cents a ton will practically double the revenue from this source, which amounted to $275,000 in 1921, when production was at a low ebb. By imposing a tax on grain elevators the government will derive about $45,000 from an entirely new source.

Higher rates established under the Amusements tax will boost the collection of $181,000 made in 1921 to well over $265,000 this year, it is anticipated.

Increasing the taxation of the fire and life insurance companies from one to two percent. on premium returns, will bring in approximately $220,000 this year instead of $110,000 as in 1921.

The tax on express companies is advanced from $250 to $500 annually in Edmonton and Calgary with a higher schedule for smaller centres in the province. Telegraph companies are required to pay on a basis of two instead of one percent. as in the past. These increases will mean additional revenue of about $15,000.

Under an agreement with the C.P.R. in respect to the tax on provincial mileage, the company will pay $135 a mile instead of $100 a mile in taxes, this meaning $38,000 extra. Last year the railway mileage tax brought in $188,700 from the C.P.R. alone, the tax on the Canadian National lines being still in dispute in the courts.

The license now imposed on produce merchants is an entirely new tax, but at the nominal fee of $10 is not expected to produce more than $10,000 in revenue.

Under the new schedule of collections under the succession duties tax branch, it is expected that the revenue will be about $25,000 more this year. Restaurants and places of refreshments in cities and towns are required to pay a license of $10 yearly, with $5 for such places in villages. Liquor export concerns must pay a license of $2,000 for each warehouse, with a surcharge of over $2 a gallon for all stocks of 1,000 gallons on October 1st. From these two new sources a revenue of $75,000 will be obtained.

While the taxation rate on joint stock companies was increased from twenty cents to 40 cents for each thousand dollars worth over $20,000, the new rate will not come into effect until January, 1923, and the maximum remains at $500, so many of the larger companies in the province will not be called upon to contribute any more than they at present are doing.

DAIRY PRODUCTS EXPORTATION

Official Grading to Be Undertaken With a View to Improvement and Uniformity.

As the Dairy and Cold Storage Commissioner of the Dominion Department of Agriculture states, the development of the dairying industry in New Zealand during the last twenty years is of great significance to Canada. In 1904 that country exported 35,203,728 lbs. of butter and 5,691,920 lbs. of cheese. Seventeen years later it exported 72,894,752 lbs. of butter and 151,588,304 lbs. of cheese. This enormous increase of over a hundred percent. in one instance and fifteen hundred percent. in the other is attributable to management, industry, and climatic and pastoral conditions, and to the fact, in the case of cheese, that their product is better seasoned on landing than our own. The last fact the Commissioner is inclined to attribute in a measure to the greater distance the cheese has to be carried, and to the care that is taken in temperature during transportation. Whatever the cause, it is plainly up to Canada to adopt every measure that is calculated to bring about not only improvement but stability in the situation as far as she is concerned. One step in this direction, and a most beneficial step it is hoped it will prove, is the proposed grading and standardization of dairy products sent from this country. Nothing of this nature emanates from the Department at Ottawa without consulting the interests concerned. Conferences are held to which representatives of dairy and allied associations are invited, as well as both dominion and provincial officials. At the most recent gathering of this kind held in Ottawa, upwards of sixty delegates were present and the consensus of opinion proved to be overwhelmingly in favor of grading. Addresses were delivered by Hon. W. R. Motherwell, Dominion Minister of Agriculture, Dr. J. H. Grisdale, Deputy Minister, Miss Helen G. Campbell, silk specialist of the Department, and Mr. J. A. Ruddick, Dairy Commissioner, who presided. Discussion of the question in all its phases took place, and it was understood that regulations under the Dairy Products Act would be formulated as regards the grading of exports and put in force as soon as a staff of thoroughly qualified graders could be got together. It is proposed that there be four grades each for butter and cheese, the butter being designated as specials, firsts, seconds, and off-grades, and the cheese as finest, fine, seconds and off-grades.

ANIMALS PLACED FOR SALE AT EDMONTON BULL SALE WENT WELL

Edmonton, April 12.—Wednesday morning saw the last session of the purebred bull sale at the arena. Thirty-four Shorthorns over 18 and under 24 months, were disposed of at prices which averaged $140 each. With one or two exceptions every animal which was put up for auction was sold, the minimum price being set at $75. Premier Greenfield was among the bidders.

Several strings of bulls from well known raisers were included in those on the market. J. G. Clarke and Sons of Clarke Manor, Alta., entered the largest lot, which consisted of 10 of the well known Casalta family. A very good price was realized on all of the animals, Casalta Nonpariel Duke going for $230, while the lowest seller, Casalta Perfection, brought $105. The lot averaged $150 each. S. R. English, Lanuke, Alta., sold eight of his purebreds, and while $140 was the highest price paid, none went lower than $100.

Shortly after the reconstruction period an old Southern planter met one of his negroes whom he had not seen since the latter's liberation.

"Well, well!" said the planter, "what are you doing now, Uncle Josh?"

"Fee a-preaching ob de gospel."

"What! You preaching!"

"Yassah, marster, I'se a-preaching."

"Well, well! Do you use notes?"

"Nossah. At de fust I used notes, but now I demands the cash."

LATEST NEWS

James W. Walsh, a well known press telegrapher, died at Vancouver on Wednesday. He was born in New Brunswick about 46 years ago.

Appealing for support on "the basis of record and policies," Premier Dunning has issued a manifesto to the electors of Saskatchewan.

Found guilty on a charge of rape, on September 1, 1920, Emil Loraine was sentenced to 15 years in the penitentiary at Montreal. On Wednesday morning his brother, Joseph, surrendered himself to the police and confessed that he had committed the crime.

With an early spring well on the way, plenty of moisture guaranteed for early months, a bumper crop was predicted for Manitoba in 1922 by G. H. Malcolm, minister of agriculture, when discussing the general situation on Wednesday.

The Dominion government has definitely decided to adopt a policy of hog grading, according to an announcement made at Toronto on Wednesday by H. S. Arkell, live-stock commissioner, who addressed the agricultural committee of the Ontario legislature.

Rev. William John McKay, aged 64, of the Canadian Baptists, died at his home in Toronto on Wednesday. Death was due to uremia.

J. H. Coterr, aged 28, a French-Canadian resident of North Bay, Ont., awoke on Thursday morning to find himself the possessor of $500,000 which had been willed to him by his uncle, Alfred Coterr, of Lawrence, Mass.

The future of the self-propelled gasoline railway car, to meet the needs of the branch lines service and with due regard to operation costs, has been considered by the Canadian National Railways management, according to W. C. Kennedy's railway statement in the house on Tuesday.

Speaking before the Canadian club at Kingston on Tuesday evening, H. H. Stevens, M.P., Vancouver, made a strong appeal for a policy of restricted immigration. "We want an increase in population," he said, "but we must shut the bars against all races and types that cannot be assimilated by us."

Charles Simpson Boone, 68, president of the C. S. Boone Dredging and Construction Company, Ltd., of Toronto, died on Tuesday.

A plea for the short sermon as against "the inflated verbosity of a bygone generation," was made by Dr. Richard Roberts, formerly of Boston, pastor of the American Presbyterian church, before the convocation of Wesleyan Theological College, Montreal, on Tuesday evening.

His eminence, Cardinal Begin, the head of the Roman Catholic hierarchy in Canada, arrived at his episcopal seat at Quebec, returning from Rome, where he went to attend the conclave at which Pope Pius XI. was elected.

Following a verdict of the jury that Tilda Fehr, 10 months old, of Haskett, Man., had died from blows on the head delivered by her mother, Mrs. David Fehr, has been placed under arrest. It is alleged that the woman slapped the baby so hard on the head that her skull was fractured.

C. H. Mansur, aged 51, a native of Stanstead, Que., and solicitor for the G.T.P. railway for some years previous to 1915, when he went overseas, died at his home at Winnipeg after a long illness.

The Canadian naval squadron, consisting of the light cruiser, two destroyers and two submarines, arrived in Halifax on Tuesday from West Indian waters.

VETERANS AGREE ON POLICY FOR GOVERNMENT

Ottawa, April 12.—Considerable progress was reported at yesterday's meeting of the legislative committee of the Dominion Veterans' Alliance which has under discussion the demands of the different veteran organizations throughout the Dominion, with the purpose of presenting to the Dominion government a united front when application is made to government to give effect to these demands.

After debate on pensions, the following was unanimously agreed upon:

1. That the pensions awarded a widow or dependent widow mother without children or dependents be increased to $75 per month without regard to income from any other source.

2. That the pension awarded a widow with children shall be $75 a month plus $25 a month for the first child, $15 per month for the second, and $12 per month for each additional child.

3. That no deduction in pension be made because of the fact that the pensioner does not reside in Canada.

The following was deferred:

"That the scale of pensions for disabled pensioners be fixed at the monthly rate of one dollar per one percent. of disability."

QUESTION OF TUBERCULOSIS

It was also agreed that specialists should determine in individual cases how long after termination of service the appearance of tuberculosis may be attributed to service, and that 100 percent. disability be given to a tubercular man for one year after discharge from hospital.

Payment for funeral expenses of widows, wowed mothers or children in receipt of pensions was also agreed upon.

The committee will sit all day tomorrow with the expectation that their deliberations will be concluded by tomorrow night.

INDIA RUBBER ROAD IN DANISH CAPITAL

Copenhagen, April 5.—Rubber roads may be an invention of the twentieth century. A certain rubber manufacturing company has offered to lay a sample india rubber road, 330 yards long, in a suburb of Copenhagen. It is claimed that this type of road is infinitely superior to those in general use and will last half a century at least.

ARBUCKLE HAS BEEN ACQUITTED MANSLAUGHTER

Defendant Received the Verdict With a Great Sigh of Relief.

San Francisco, April 12.—A verdict of acquittal was returned by a jury tonight in the third trial of Roscoe (Fatty) Arbuckle on a manslaughter charge growing out of the death of Miss Virginia Rappe, motion picture actress. The jury was out six minutes.

The defendant was deeply affected. He received the verdict with a great sigh of relief. There was no demonstration, the court having warned against it. Mrs. Minta Durfee Arbuckle, the defendant's wife, cried quietly. Both she and Arbuckle shook hands with the jurors.

The verdict was by acclamation.

"Arbuckle has no immediate plans," Gavin McNab, his chief counsel said. "It was a splendid victory."

Los Angeles, April 12.—Whether motion pictures showing Roscoe C. "Fatty" Arbuckle will be shown again is to be determined by the board of directors of the Famous Players Lasky corporation, whose headquarters is in New York, it was stated late, today by Cecils B. De Mille, director general of the corporation, upon being informed that Arbuckle had been acquitted.

The pictures were withdrawn by the corporation soon after Arbuckle's arrest last September. Mr. De Mille said no arrangements had been made for release of the pictures in the event of an acquittal.

SOLDIER SETTLEMENT STOCK

Condor, April 8th, 1922.

Mr. Editor:—

No doubt most of your readers are acquainted by now with Mr. Speakman's attitude in regard to the revaluation of the Soldier Settlers' stock and implements, and have read his speech in the house relating to it. While the majority of those who have given the matter a thought recognize the wisdom of a re-valuation, there are some who do not favor such a scheme. To those I should like to point out an aspect that has recently come to light.

The Province of Alberta had a Cow Bill Act for the encouragement of cattle raising. This has been declared by the Hon. Geo. Hoadley, Minister of Agriculture, a dead letter henceforth. He expressed a belief that while it would be possible for the province to redeem a portion of the $1,500,000 and accrued interest, he claimed the act had been a failure financially, and owing to tremendous losses in cattle and the collapse of the markets, the province must inevitably bear heavy deficits in the end.

Now, the soldier settler bought his cattle under very similar conditions from the federal government as the provincial government sold to the stock buyers, only that the majority of the soldier settlers bought soon after returning from the war when cattle prices were at their highest pinnacle. The provincial losses on their "cow bill" must now be covered by increased taxation, of which the soldier settler must pay his share, in addition to paying for his own stock to the federal government; not a very encouraging position to one who volunteered to fight, and, if necessary, make the supreme sacrifice for his country. It is to be hoped that every influence will be brought to bear to have the government adopt the recommendations of our local member, and encourage the soldier settler to stay with his farm and eventually make good.

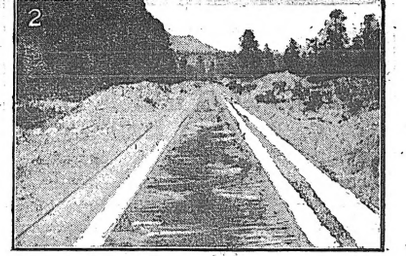
Soldier Settlement and Irrigation



(1) Intake gates and dam on Okanagan River.
(2) Main canal, near Intake.

Irrigation is coming into its own in Western Canada. Pioneers of the older provinces began with an axe and an ox team and were skeptical of the farmers becoming their own rain makers. Now the irrigated districts such as the Okanagan Valley, British Columbia, not long since a desert, bloom like a rose through the vitalizing wealth of the waters of irrigation. A large acreage that is now being won from nature is the soldiers' settlement land in the Southern Okanagan — a 2,200 acre tract that is of national interest because of its strategic location and the engineering skill required to make it of service to the soldier settlers. A motor trip through the settlement revealed a country rich in scenic beauty, interesting in old land marks and marvellous in present activity of transforming a wilderness into a garden. It lies in a lovely valley, extending from Vaseaux Lake to the International Boundary. The northerly part of the settlement is 22 miles from Penticton.

Water for the irrigation is supplied from the Okanagan river which, at point of diversion, is about three-quarters of a mile below Vaseaux Lake and has a width of 200 feet. A concrete dam raises the surface of the water 8 feet. The system has been built in a very permanent way with concrete lined ditches which prevent seepage losses, concentration of mineral salts and water logging. The canal is 18 feet wide on top, five and a half feet deep and capacious enough to run a boat with a flow of 170 cubic feet per second. Eleven miles of the project is finished, 5 miles partly done and when finished, 22 miles of canal will be built to the Boundary. From the varying disposition of the topography, many engineering problems and difficulties arose—problems that were unique in engineering in America. Various experiments had to be resorted to which included the use of great wood stave pipes and riveted steel pipes, some 80 inches in diameter.

An example of the immensity of the task as well as of the engineering skill required in the construction of thirteen flumes in the nine miles from the Intake to the cement pipe works. There will be about 1,200 acres of irrigable land in the plot and the land is being developed under the most favorable conditions with an ample supply of water.

A plant for the manufacture of concrete pipes is one of the extensive industries of the settlement. Twelve miles of pipe will be built this season by 26 men, with an output of 660 feet of piping a day.

A portion of the land was put on sale last spring and about 600 acres sold. The first orchard was planted by Perley Simpson, a returned soldier, belonging to the construction camp.

The town of Oliver will be the administrative centre of the district. It is one of the few planned towns in Canada and is not being developed in a haphazard way with speculation in sub-divisions. The Government have placed on the market just what is needed, and this will be sold off before further land is open for sale. There are areas for a park, for a city hall, for a school, for various public buildings and space for all that is required for an up-to-date town.

The Oliver recreation grounds are across the river from the town, the present site of the big irrigation construction camp. The young men built a permanent recreation hall after being supplied with lumber and various requirements by the Government. An athletic association was formed and now the hall, a fine structure, 50 by 70 feet, serves the fast growing community as a centre for concerts, dances, basketball and general sport.

A demonstration plot has been established about five miles south of Oliver, on the main highway where 24 acres are now under cultivation with six acres in young trees which will be sold to the soldier settlers.

Leaving Penticton, on our trip to Oliver, each interest beckoned to a fresh delight. Winding in among the hills, we sped around Dog Lake.

The steamer "York" on the shore, will be used by the Kettle Valley Railway, from Penticton to join with rail again at Okanagan Falls on the way to Oliver and the Boundary. Passing Vaseaux Lake, through the stock raising country there was a wealth of beautiful scenery — the water lilies on the lake, the wild swans who make their home there all the year around, the overhanging rock on the motor road, all added to the beauty of the scene.

A point of interest was the big construction camp where we had dinner at the headquarters staff dining room. It is a regular settlement with even the hen and her little chickens a part of the scene. 311 men of the camp make their home there and it will be the place of the camp for the next two years. For the workmen there is an immense dining tent and 150 men are served at once. C. G.

$270 CUT

In Price of

TITAN 10-20 TRACTOR

THE TITAN 10-20 kerosene tractor, complete with all essential equipment—friction clutch pulley, fenders, platform, throttle governor adjustable drawbar, angle lugs, brakes—is now priced to our trade at $895.00 cash, f.o.b. Calgary, Alberta. As at all times in the past, reasonable terms will be given to any man who cannot pay cash in full.

Three Furrow Tractor Plow FREE

The Harvester Company has authorized us to give to each farmer purchasing a new Titan 10-20 kerosene tractor for delivery on or before May 1st, 1922—a regular 3-furrow tractor plow, (a plow we sell for $225.00) ABSOLUTELY FREE, such plow f.o.b. Hamilton, Canada. If you already have a tractor plow we will substitute a tractor disk harrow.

This is the greatest value ever offered in power farming equipment and you should see us at once.

BANK OF ENGLAND REDUCES DISCOUNT RATE TO FOUR P.C.

Great Britain Has Lowest Rate in World With Exception of Switzerland.

London, April 13.—The Bank of England today reduced its discount rate to 4 per cent. The last previous reduction was on February 16 last, when the rate was dropped fom 5 to 4½ per cent.

The reduction coming on the eve of the Easter holidays was an entire surprise to the money market and financial interests. Business in Lombard street had commenced this morning without the usual "subject to lower bank rate," which is usually posted when there is a possibility of a reduction during the day, and the belief is expressed that the action was prompted by the treasury, which has been ruling the money market for some time past.

The reduction, however, was welcomed as another step in the restoration of more normal conditions and the loosening of money for trade purposes.

New York, April 13.—With the exception of Switzerland, Great Britain now has the lowest bank rate in the world, as the result of the Bank of England reducing its discount rate today to 4 per cent. Switzerland cut its 4 per cent. rate to 3½ per cent. on March 2, on account of the excessive gold supply in that country.

The British rate compares with a high of 10 per cent. on August 1, 1914, and a low of 3 per cent. on January 29, 1914.

78th BATTERY CANADIAN FIELD ARTILLERY

Battery orders by Major R. C. Lister, M.C., M.M.

Week ending April 29th, 1922.

Orderly Sergt.—Corp. Macfarlane. Next for duty—Sergt. Falco.
